Color Management in Mac OS X Joshua Weisberg, 2004. In the not so distant past, color reproduction was considered a craft, one handled by skilled craftspeople using proprietary systems. Today, thanks to the proliferation of desktop systems and devices, everyone and their uncle can get their hands in. But the bottom line is this: It's still a craft, and to apply color consistently and correctly across various hardware, software, and output devices, you need this hands-on, project-based guide. As the only Apple-certified tutorial on the topic, this book cuts through the theory to go straight to the heart of the matter. How to set up a Mac OS X-based workflow for those situations in which you employ color photography and image capture, page layout, and content creation and output to desktop printer or press. Author and color expert Joshua Weisberg distills a complicated process to its step-by-step essentials through a series of lessons and exercises that you can follow while using the files on the companion DVD.
