Higher education is expanding, internationalizing, and changing rapidly around the world. Yet, many of the broader international higher education community and funders are unaware that much of what the United States has achieved in quality higher education derives from the student affairs staff. This volume addresses the opportunities and challenges in creating student learning and development programs and strategies that are culturally appropriate and use best practices from regions around the world. This volume includes: suggestions using the whole institutional environment—curriculum and co-curriculum; examples from China, Mexico, Singapore, South Africa, and the United Kingdom; and holistic and engaging approaches through student affairs, student development, and student services. This will be of interest to all those who value quality higher education no matter what their role. The intent is to convince broader constituencies of the merit of enhancing the student experience so that students worldwide will benefit from enhanced learning and development opportunities. This is the 175th volume of the Jossey-Bass quarterly report series *New Directions for Higher Education*. Addressed to presidents, vice presidents, deans, and other higher education decision makers on all kinds of campuses, it provides timely information and authoritative advice about major issues and administrative problems confronting every institution.

Sustainable Chemistry Research

This is an open access book. It is a common cause globally that the abrupt emergence of Covid-19 wreaked havoc in all sectors, including the higher education system. The sudden closure of campuses as a social distancing measure to prevent community transmission has shifted face-to-face classes to online teaching and learning, a transformative experiment for academics and students in most institutions. This has thrown the focus on utilising Learning Management Systems (LMS), eLearning tools and platforms for effective student engagement, which may have limitations of accessibility and affordability for many students. The pandemic has exposed the shortcomings of the current higher education system and the need for more training of academics and practitioners in digital technology to adapt to the rapidly changing educational climate. In the post-pandemic situation, eLearning and virtual education may become an integral part of the higher education system, hence the question of re-inventing higher education. The higher education institutions and universities need to plan the post-pandemic education and research strategies to ensure student learning.
