**Applied Cognitive Linguistics in Second Language Learning and Teaching** Jeannette Littlemore, Constanze Juchem-Grundmann, 2010 Cognitive Linguistics can make to language teaching Cognitive Linguistic findings are gradually being applied to Second Language Acquisition SLA This title covers the key areas of the research in the area Applying Cognitive Linguistics Ana María Piquer-Píriz, Rafael Alejo-González, 2018-08-03 In recent years Cognitive Linguistics CL has established itself not only as a solid theoretical approach but also as an important source from which different applications to other fields have emerged In this volume we identify some of the current most relevant topics in applied CL oriented studies analyses of figurative language both metaphor and metonymy in use constructions and typology and present high quality research papers that illustrate best practices in the research foci identified and their application to different fields including intercultural communication the psychology of emotions second and first language acquisition discourse analysis and translation studies It is also shown how different methodologies the use of linguistic corpora psycholinguistic experiments or discourse analytic procedures can shed some light on the basic premises of CL as well as providing insights into how CL can be applied in real world contexts Finally all the studies included in the volume are based on empirical data and there are some analyses of languages other than English Japanese Russian Spanish Danish German and Polish thus overcoming the contentions that CL theoretically based research is often based on linguistic intuition and focused only on the English language We hope that the present volume will not only contribute to a better understanding of how CL can be applied but that it will also help to encourage even further more robust empirical research in this field Originally published as a special issue of *Review of Cognitive Linguistics* 14 1 2016 *The Bloomsbury Companion to Cognitive Linguistics* Jeannette Littlemore, John R. Taylor, 2014-06-19 The Bloomsbury Companion to Cognitive Linguistics is a comprehensive and accessible reference resource to research in contemporary cognitive linguistics Written by leading figures in the field the volume provides readers with an authoritative overview of methods and current research topics and future directions The volume covers all the most important issues concepts movements and approaches in the field It devotes space to looking specifically at the major figures and their contributions It is a complete resource for postgraduate students and researchers working within cognitive linguistics psycholinguistics and those interested more generally in language and cognition Applying Cognitive Linguistics to Second Language Learning and Teaching Jeannette Littlemore, 2023-10-27 This is a revised and updated edition of a seminal text in the field of Cognitive Linguistics written in an engaging and accessible style for a new generation of scholars and students The author surveys and incorporates a wealth of more recent studies conducted in different areas since the book's original publication in 2009 exploring how new areas of research within Cognitive Linguistics have emerged and flourished and taking account of key studies that have progressed the field since its inception This new edition has been revised throughout to review analyse and synthesise the latest state of the art in Cognitive Linguistics

*Metaphor in Communication, Science and Education* Francesca Ervas,Elisabetta

Gola,Maria Grazia Rossi,2017-08-07 This collection of papers presents some recent trends in metaphor studies that propose new directions of research on the embodied cognition perspective The overall volume in particular shows how the embodied cognition still remains a relevant approach in a multidisciplinary research on the communicative side of metaphors by focusing on both comprehension processes in science as well as learning processes in education

**Handbook of**

**Cognitive Linguistics and Second Language Acquisition** Peter Robinson,Nick C. Ellis,2008-03-29 This cutting edge volume describes the implications of Cognitive Linguistics for the study of second language acquisition SLA The first two sections identify theoretical and empirical strands of Cognitive Linguistics presenting them as a coherent whole The third section discusses the relevance of Cognitive Linguistics to SLA and defines a research agenda linking these fields with implications for language instruction Its comprehensive range and tutorial style chapters make this handbook a valuable resource for students and researchers alike

**Moving Across Languages** Alberto Hijazo-Gascón,2021-08-23 The book analyzes the complex relationship between languages in the bilingual mind with a focus on motion event typology and the acquisition of Spanish as a second language L2 The author starts out by examining L1 patterns which are transferred to less

complex L2 systems The data discussed was elicited by German learners of Spanish A similar transfer is observed when L1 is typologically and genetically close as in the case of French and Italian learners of Spanish Furthermore the author clarifies the relevance of intra typological differences within the same linguistic family including important differences in the lexicalization patterns of Italian with respect to French and Spanish The findings contribute to our understanding of the field of motion event typology and thinking for speaking The book demonstrates that conceptual transfer is present in different aspects of the motion lexicalization domain Interestingly there are some challenging aspects both for speakers whose first language is typologically different and for those whose language is typologically close The book offers suggestions on how these challenges in the restructuring of meaning in L2 can be addressed in language teaching Specifically pedagogical translation and mediation present promising pathways to the strengthening of semantic competences in the L2     Applied Language Learning ,1997     *Studies in Korean Linguistics and Language Pedagogy* Sung-Ock S. Sohn,Sungdai Cho,Sök-hun Yu,2013

**Understanding Second Language Process** Zhaohong Han,Eun Sung Park,2008 This book assembles 11 analytical and empirical studies on the process of second language acquisition probing a wide array of issues from transfer appropriate processing to L2 default processing strategies among hearing or deaf learners of a variety of target languages including English Japanese Chinese Korean French Spanish and American Sign Language Although instruction per se is not the focus of this volume the chapters are written with instructed learners in mind and hence offer valuable insights for both second and foreign language researchers and practitioners     Applied Linguistics ,1998     Strategies in Learning and Using a Second Language Andrew D. Cohen,1998 Cohen explores the important linguistic topic of learner strategies the ways in which language learners engage with the process of learning and communicating a new language Questions and areas for further study are included in the book

**Language Learner Strategies: 30 Years of Research and Practice** Andrew Cohen,Ernesto Macaro,2007-11-29 Provides a unique and timely re examination of key issues such as strategies in context strategy instruction and strategy research methods by numerous experts in the field Offers an invaluable overview of what is known from empirical research about listening reading speaking writing vocabulary and grammar strategies Proposes a clear and focused research agenda for the next decades     *Language Learning Strategies in Independent Settings* Stella Hurd,Tim Lewis,2008 In recent years traditional classroom based language tuition has been increasingly overshadowed by innovative approaches such as distance learning supported independent learning and blended learning with an online component This timely volume examines the use of language learning strategies in a range of independent settings and addresses key issues for independent learners such as autonomy strategic awareness and self regulation

**Common European Framework of Reference for Languages** Council of Europe,2002 This Framework has been widely adopted in setting curriculum standards designing courses developing materials and in assessment and certification This compendium of case studies is written by authors who have a considerable and varied experience of using the

Framework in their professional context The aim is to help readers develop their understanding of the Framework and its possible uses in different sectors of education     *Australian Review of Applied Linguistics* ,1996     Jyväskylä studies in education, psychology, and social research ,1962     Conversational Interaction in Second Language Acquisition Alison Mackey,2007-10-04 Conversational Interaction in Second Language Acquisition A Series of Empirical Studies Oxford applied linguistics
