**Applied Partial Differential Equations with Fourier Series and Boundary Value Problems** Richard Haberman, Paul Choboter, 2026

This textbook discusses partial differential equations of applied mathematics in the physical sciences and engineering. Partial differential equations can be used to model phenomena such as heat flow, the propagation of light and sound waves, fluid dynamics, and traffic flow. This book approaches the subject from an applied mathematics perspective. The equations are motivated and derived with simple models. Solution techniques are developed patiently and mathematical results are frequently given with physical interpretations.
