John E. Horner, 2012-06-05 In 1947 at the age of nine I was instructed to help my older brothers drain the corn rows Aware then that water was precious in Nebraska I obeyed but the question stayed with me My first paying job at the age of 12 was a two week assignment of weeding 250 seedling pines for 1 00 total pay I didn't know then that I would become an earnest advocate for trees Fast forward through the years of study and work and this advance postscript to my book comes to mind This book proposes to reduce the occurrence of El Nino to about once in 15 years I believe it is possible to all but eliminate late season devastating hurricanes With those two beliefs I endeavor to impel the diligent into this book I believe I followed faithfully where scholars led and only drew necessary and fitting conclusions And finally the belief that we should successfully harness the mighty geothermal power of Yellowstone before the tragedy of eruption With this understanding of farm family and the future necessity of clean water JOHN E HORNER has endeavored to acknowledge some of the current problems with our lack of respect for clean and bountiful water and offer solutions to the present and future water crisis

Unstoppable Global Warming Fred Singer, Dennis Avery, 2006-09-13 Singer and Avery present in popular language supported by in depth scientific evidence the compelling concept that global temperatures have been rising mostly or entirely because of a natural cycle Using historic data from two millennia of recorded history combined with the natural physical records found in ice cores seabed sediment cave stalagmites and tree rings Unstoppable Global Warming argues that the 1 500 year solar driven cycle that has always controlled the earth's climate remains the driving force in the current warming trend Trillions of dollars spent on reducing fossil fuel use would have no effect on today's rising temperatures The public policy key Singer and Avery propose is adaptation not fruitless attempts at prevention Further they offer convincing evidence that civilization's most successful eras have coincided with the cycle's warmest peaks With the added benefit of modern technology humanity can not only survive global climate change but thrive CBC Times Canadian Broadcasting Corporation, 1959
