

## SO YOU'RE IN A SPOT OF TROUBLE.

Well, you are alive and you have—until the last—six hours. Stay and keep your head up—whether you know it or not, we largely have you in your survival mind-set now.

Oh, first things first: **RELAX**. Take a deep breath and relax—relaxed. This is just as true when you are in a survival situation as getting your problem sorted. Then, before you start the process I am so much more in **Focus** (remember: What's First: **P**rotection, **R**elax, **W**ater, **F**ood). These are the absolute basics you need to survive. And survival has needs to **decide** your mission one place. So here we go—down to business.

### PRIORITIES OF SURVIVAL

### POCKET GUIDE

## PROTECTION

Protection from the elements, from predators, from yourself, and from your own lack of knowledge and priority in a number of situations.

## FIRE

The only priority you can have, right, is survival and protection. There are many ways to light your fire. A lighter, matches, fire starters, or even matches. Using the natural approach, that will be 100%—100% in the next 1000.

Choose the location for your fire wisely. Return generally to you space and wind direction along the most important considerations. Build a base of green branches. If the ground is wet, or soggy, it will be beyond a fire a safety. A fire requires three ingredients: Oxygen, Fuel and Heat. Gather and fuel before you attempt to start your fire. Look for wood that is off the ground to ensure you don't expose it to being dry, like for dura-

fire
