Smythe, 2013-05-13 This closely integrated collection of essays constitutes a wide ranging and comprehensive attempt to understand persons within psychology a long lost enterprise The volume was inspired by the observation that contemporary psychology has become increasingly depersonalized in its conceptions and its methodology and has thereby lost touch with its traditional subject matter of human individuality and the nature of persons This development now threatens the integrity of psychology as a discipline Using both a critical and constructive approach the various contributors share two common objectives to explore the roots of depersonalization in modern psychology through systematic criticism of contemporary functionalist and neo functionalist approaches to articulate some alternative holistic interpretive and historical approaches to the psychology of persons Despite these common objectives the chapters reflect a wide variety of theoretical perspectives and approaches including cognitive science and neuroscience discursive psychology hermeneutics social constructionism semiotics rhetorical analysis and psychological aesthetics These essays do not converge on a unified psychology of persons but they do serve to reopen a form of discourse that has long been absent from mainstream psychology This volume emerged from the deliberations of the Western Canadian Theoretical Psychologists WCTP a group of scholars primarily from Western Canadian universities with shared interests in the history and theory of psychology From its founding in 1989 to the present the WCTP has been actively engaged in promoting and contributing to the development of theoretical psychology Over the past half dozen years scholars have greatly benefitted from the close collaboration and collegial support that participation in the WCTP makes possible The annual meetings provide an opportunity for them to catch up on each other's work and also to pool their expertise to work on topics of shared interest The Photograph Graham Clarke, 1997 In this rich and fascinating work Clarke gives a clear and incisive account of the photograph's historical development elucidating the insights of the most engaging thinkers on the subject including Roland Barthes and Susan Sontag The Photograph offers a series of discussions of major themes and genres providing an up to date introduction to the history of photography 130 illustrations 16 in color Creative Camera, 1988 The Cooperstown Symposium on Baseball and American Culture, 1999 Peter M.
