## N2 Drawing Previous Question Papers:

*Graph Drawing* Giuseppe Liotta, 2004-03-04 The 11th International Symposium on Graph Drawing GD 2003 was held on September 21-24 2003 at the Università degli Studi di Perugia Perugia Italy GD 2003 attracted 93 participants from academic and industrial institutions in 17 countries. In response to the call for papers the program committee received 88 real submissions describing original research and/or system demonstrations. Each submission was reviewed by at least 4 program committee members and comments were returned to the authors. Following extensive e-mail discussions the program committee accepted 34 long papers (12 pages each in the proceedings) and 11 short papers (6 pages each in the proceedings). Also 6 posters (2 pages each in the proceedings) were displayed in the conference poster gallery. In addition to the 88 submissions the program committee also received a submission of special type one that was not competing with the others for a time slot in the conference program and that collects selected open problems in graph drawing. The aim of this paper, which was refereed with particular care and UNCHANGED two rounds of revisions, is to stimulate future research in the graph drawing community. The paper presents 42 challenging open problems in different areas of graph drawing and contains more than 120 references. Although the length of the paper makes it closer to a journal version than to a conference extended abstract we decided to include it in the conference proceedings so that it could easily reach in a short time the vast majority of the graph drawing community.

**Towards a Theory of Geometric Graphs** János Pach, 2004 This volume contains a collection of papers on graph theory with the common theme that all the graph theoretical problems addressed are approached from a geometrical rather than an abstract point of view. This is no accident the editor selected these papers not as a comprehensive literature review.

**Computational Geometry** Alberto Márquez, Pedro Ramos, Jorge Urrutia, 2012-11-13 This Festschrift volume is published in honor of Ferran Hurtado on the occasion of his 60th birthday. It contains extended versions of selected communications presented at the XIV Spanish Meeting on Computational Geometry held at the University of Alcalá Spain in June 2011. Ferran Hurtado has played a central role in the Spanish community of Computational Geometry since its very beginning and the quantity and quality of the international participants in the conference is an indisputable proof of his relevance in the international level. The 26 revised full papers were carefully reviewed and selected from numerous submissions. The papers present original research in computational geometry in its broadest sense. Topics included are discrete and combinatorial geometry, linear programming applied to geometric problems, geometric algorithms and data structures, theoretical foundations of computational geometry, questions of interest in the implementation of geometric algorithms and applications.
