The Health of

Newcomers Patricia Illingworth,Wendy E. Parmet,2017-01-24 Immigration and health care are hotly debated and contentious issues Policies that relate to both issues to the health of newcomers often reflect misimpressions about immigrants and their impact on health care systems Despite the fact that immigrants are typically younger and healthier than natives and that many immigrants play a vital role as care givers in their new lands native citizens are often reluctant to extend basic health care to immigrants choosing instead to let them suffer to let them die prematurely or to expedite their return to their home lands Likewise many nations turn against immigrants when epidemics such as Ebola strike under the false belief that native populations can be kept well only if immigrants are kept out In The Health of Newcomers Patricia Illingworth and Wendy E Parmet demonstrate how shortsighted and dangerous it is to craft health policy on the basis of ethnocentrism and xenophobia Because health is a global public good and people benefit from the health of neighbor and stranger alike it is in everyone's interest to ensure the health of all Drawing on rigorous legal and ethical arguments and empirical studies as well as deeply personal stories of immigrant struggles Illingworth and Parmet make the compelling case that global phenomena such as poverty the medical brain drain organ tourism and climate change ought to inform the health policy we craft for newcomers and natives alike

Crisis

Preparedness Stella R. Quah,2007 Throughout history nations have waged war against epidemics from bubonic plague to

pulmonary tuberculosis Today we confront HIV AIDS SARS and avian influenza among other major infectious diseases

Scientists around the world scrutinize viruses and bacteria more intently than ever Yet while scientific advances are crucial they are insufficient The world is not well prepared for the next health crisis This timely book argues that the battle against infectious disease epidemics must be fought on two fronts The first of course is the laboratory The second is the wider social

context that involves ordinary individuals and groups legislators and the state The failure to contain HIV AIDS and the emergence of new infectious diseases highlight the inadequacies of current preventive and management approaches to deal with epidemics The authors of Crisis Preparedness offer perspectives from social science epidemiology and public health collectively seeking to answer the question How can we prepare for the next global epidemic **Measuring Effectiveness in Humanitarian and Development Aid** Andre M. N. Renzaho,2007 Donor countries are currently scaling up their aid programmes in response to strategies proposed through the Millennium Development Goals Recent positive research on the impact of foreign development aid has led to increased expectations on the part of donor countries Research suggests that per capita income growth over the last decade would have been lower in the absence of aid and also that public sector expenditure on health and education in developing countries would not have been as great without aid inflows However there still remain many significant gaps in knowledge on aid allocation and effectiveness This book addresses a number of these gaps and provides many new and important analytical insights into aid Among the topics covered are the interface between aid allocation and perceptions of aid effectiveness the inter recipient concentration of aid from non government organizations the year on year volatility of aid impacts of aid on public sector fiscal aggregates and evaluation of the country level impacts of aid The book is an essential companion for professionals engaged in aid policy reforms and also for scholars in the areas of development economics international finance and economics *National Tuberculosis (TB) Monitoring & Evaluation Plan, 2009-2011* ,2009 *The Third World in Social Science Perspective* ,2008 *Transactions of the National Academy of Science and Technology* ,2010 **Annual Epidemiological Report on Communicable Diseases in Europe 2010** European Centre for Disease Prevention and Control,2010 Recoge 1 Introduction structure and methods 2 Epidemiology of communicable diseases in Europe 2008 Respiratory tract infections Sexually transmitted infections including HIV and blood borne viruses Food and waterborne diseases and zoonoses Emerging and vector borne diseases Vaccine preventable diseases Antimicrobial resistance and healthcare associated infections
