

# 11 Editing Patches

The SD1 comes with 24 predefined patches that have been programmed at the factory. However, the SD1 offers many more possibilities for creating effects in innovative ways. To discover these possibilities, we recommend that you try out the editing function in the SD1 to create your own patches. The mode in which patches can be edited is called the Edit mode.

To switch from normal Play mode to Edit mode, briefly press the EDIT key. Do not keep the EDIT key depressed, because if the key is held for 1 second, the Bank Hold mode will be activated.

- (1) While still in Play mode, select the patch you wish to edit.
- (2) Press the EDIT key to activate the Edit mode.

Immediately after switching from the Play mode to the Edit mode, the parameter value position at the highest position (COMP module), regardless of which patch was selected. The COMP module setting of the current patch is shown on the display.

While Edit mode is active, each push of the EDIT key causes the parameter cursor to move one position down. The flashing position shows which module is selected for editing. The relation between parameter cursor LEDs and modules is as shown below:

|                          |                                     |
|--------------------------|-------------------------------------|
| 1st parameter cursor LED | COMP module setting                 |
| 2nd parameter cursor LED | EQ module (distortion type setting) |
| 3rd parameter cursor LED | EQ module (distortion gain setting) |
| 4th parameter cursor LED | 2ND and 3RD block settings          |
| 5th parameter cursor LED | EQ module setting                   |
| 6th parameter cursor LED | MOD module setting                  |
| 7th parameter cursor LED | ENV module setting                  |
| 8th parameter cursor LED | ENV module setting                  |

Use the VALUE + (-) keys to change parameters. (For an explanation of the value parameters, please refer to the section "Effect Parameters".) When the EDIT key is pressed while the 8th parameter cursor LED flashes, the Edit mode is cancelled and the unit returns to the Play mode.

# 12 Effect Parameters

| COMP module                                                                                                                                                                                                                                     | DIST module                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | ZNR/AMP block                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | EQ module                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | MOD module                                                                                                                                                                                                                                           | DLY/REV module                                                                                                                                                                                                                                                                   | PATCH Level                                                                                                                                                                                                                 |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Compressor</b><br>The input signal from the guitar is compressed to achieve a consistent volume level.<br><b>Setting range:</b> C 1=C9 (0.1-10)<br>Higher values result in stronger compression.                                             | <b>Distortion Type</b><br>A total of eight effect types are available, including seven different distortion types and one effect which produces a normal sound to an electric acoustic guitar.<br><b>RC (Reverb)</b><br>Gives a sound similar to an electric acoustic guitar.<br><b>2ND (2nd)</b><br>Gives slight distortion when strings are picked strongly.<br><b>3RD (3rd)</b><br>Distorted sound is during a full wrap.<br><b>4TH (4th)</b><br>Most distortion similar to driving a tube amp.<br><b>5TH (5th)</b><br>Inverted distortion with a three-stage amp.<br><b>6TH (6th)</b><br>Overdrive sound with a low cut.<br><b>7TH (7th)</b><br>Crisp tone sound with full bass.<br><b>8TH (8th)</b><br>Bright and smooth distortion.<br><b>9TH (9th)</b><br>Sounding like a normal sound.<br><b>Distortion Gain</b><br>The distortion gain is set to 0.1-10.0. Higher values result in stronger distortion (greater gain).<br><b>Setting range:</b> 0.1-10.0 (0.1-10) | <b>ZNR module</b><br>Processes the settings for ZNR (Noise Reduction) and AMP (Amplifier) modules.<br><b>AMP module</b><br>Simulates the overdrive characteristics of a guitar amplifier.<br>Both modules together form the ZNR/AMP block.<br><b>Setting range:</b> 0.1-10.0 (0.1-10)<br>Higher values result in more overdrive effect.<br><b>RC (Reverb)</b><br>Gives a sound similar to an electric acoustic guitar.<br><b>2ND (2nd)</b><br>Gives slight distortion when strings are picked strongly.<br><b>3RD (3rd)</b><br>Distorted sound is during a full wrap.<br><b>4TH (4th)</b><br>Most distortion similar to driving a tube amp.<br><b>5TH (5th)</b><br>Inverted distortion with a three-stage amp.<br><b>6TH (6th)</b><br>Overdrive sound with a low cut.<br><b>7TH (7th)</b><br>Crisp tone sound with full bass.<br><b>8TH (8th)</b><br>Bright and smooth distortion.<br><b>9TH (9th)</b><br>Sounding like a normal sound. | <b>Sound EQ</b><br>Allows boost and cut in the presence, high, midrange, and low range with the available settings.<br><b>Setting range:</b> 1=10 (0.1-10)<br>Lower values result in a stronger high-range cut and low-range boost.<br><b>2=20 (0.1-10)</b><br>Lower values result in a stronger mid-range cut and low-range boost.<br><b>3=30 (0.1-10)</b><br>Lower values result in a stronger low-range cut and low-range boost.<br><b>4=40 (0.1-10)</b><br>Lower values result in a stronger low-range cut and low-range boost.<br><b>5=50 (0.1-10)</b><br>Lower values result in a stronger low-range cut and low-range boost.<br><b>6=60 (0.1-10)</b><br>Lower values result in a stronger low-range cut and low-range boost.<br><b>7=70 (0.1-10)</b><br>Lower values result in a stronger low-range cut and low-range boost.<br><b>8=80 (0.1-10)</b><br>Lower values result in a stronger low-range cut and low-range boost.<br><b>9=90 (0.1-10)</b><br>Lower values result in a stronger low-range cut and low-range boost. | <b>Chorus</b><br>Simply 2-phase chorus without a compressor with a natural sound. It can be used as a chorus effect, or as a chorus effect with a compressor.<br><b>Setting range:</b> C 1=C9 (0.1-10)<br>Higher values result in a stronger effect. | <b>Delay</b><br>Conventional digital delay with a delay time of up to 750 ms. By increasing the effect on, you can achieve a ping-pong effect.<br><b>Setting range:</b> 0.1-750 (0.1-750)<br>Higher values result in longer delay time. When Reverb is on, it is also optimized. | <b>Patch Level</b><br>Allows setting the level of each individual patch.<br>This setting is used for each patch like the effect parameters.<br><b>Setting range:</b> 1=30 (0.1-10)<br>Higher values result in higher level. |
| <b>Limit</b><br>Limits the input signal with a compressor effect. It can be used as a compressor effect, or as a compressor effect with a limiter.<br><b>Setting range:</b> L 1=L9 (0.1-10)<br>Higher values result in more effective limiting. | <b>Auto Wah</b><br>With this effect, emphasized frequencies and notes are automatically depending on the dynamics of the input signal.<br><b>Setting range:</b> R 1=R9 (0.1-10)<br>Higher values result in a more pronounced auto wah effect.<br><b>PS (Pitch Shift)</b><br>Compressor and auto wah with a pitch shift effect. Higher values result in a more pronounced auto wah effect. Compressor intensity is fixed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <b>Phase Shift</b><br>Applies a phase shift to the input signal. The amount of shift is set by the parameter value. The effect is a phase shift effect.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <b>Flanger</b><br>Adds a very short delay to the input signal and mixes the delay time periodically, resulting in a phasing sound. Can also be used together with the chorus effect.<br><b>Setting range:</b> F 1=F9 (0.1-10)<br>Higher values result in faster flanger modulation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <b>Haar Reverb</b><br>Simulates the reverb of a hall.<br><b>Setting range:</b> H 1=H9 (0.1-10)<br>Higher values result in longer reverb time. This setting is also optimized.                                                                        | <b>Room Reverb</b><br>Simulates the reverb of a room.<br><b>Setting range:</b> R 1=R9 (0.1-10)<br>Higher values result in longer reverb time. This setting is also optimized.                                                                                                    |                                                                                                                                                                                                                             |
| <b>Phaser</b><br>Applies a phase shift to the input signal. The amount of shift is set by the parameter value. The effect is a phasing effect.                                                                                                  | <b>Step</b><br>A step-by-step effect that creates an auto wah effect. It can be used as an auto wah effect, or as an auto wah effect with a step effect.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <b>Double</b><br>Creates a direct sound with a short delay component, creating the impression of several players with moving the sound from left to right. Can also be used together with the chorus effect.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <b>Step</b><br>A step-by-step effect that creates an auto wah effect. It can be used as an auto wah effect, or as an auto wah effect with a step effect.                                                                                             | <b>Step</b><br>A step-by-step effect that creates an auto wah effect. It can be used as an auto wah effect, or as an auto wah effect with a step effect.                                                                                                                         |                                                                                                                                                                                                                             |

### 1 Selecting parameters to change

As described in "Editing Patches", parameters to be edited are selected by repeatedly pressing the EDIT key, but you can also use the patch parameter key.

### 2 Effect module on/off switching

Each effect module can be turned on or off independently. When the effect module is turned on, the effect is applied to the input signal. When the effect module is turned off, the effect is not applied to the input signal. When the effect module is turned on, the effect is applied to the input signal. When the effect module is turned off, the effect is not applied to the input signal.

### 3 Parameter setting shortcut

Normally, parameter settings are set by pressing the EDIT key. However, you can also use the shortcut function to set parameters by pressing the EDIT key. For example, if you want to set the "RC" parameter of the COMP module, you can press the EDIT key and the "RC" parameter will be set to 1.0. This shortcut function is useful for setting parameters quickly.

### 4 Volume control with FPD1

When the optional FPD1 is connected to the FPD1 jack, it can be used for adjusting the output volume of the SD1. It can be used for adjusting the output volume of the SD1. It can be used for adjusting the output volume of the SD1.

### 5 Master level adjustment

The SD1 also has a master level adjustment. It can be used for adjusting the master level of the SD1. It can be used for adjusting the master level of the SD1.

### 6 Effect module on/off switching

Each effect module can be turned on or off independently. When the effect module is turned on, the effect is applied to the input signal. When the effect module is turned off, the effect is not applied to the input signal. When the effect module is turned on, the effect is applied to the input signal. When the effect module is turned off, the effect is not applied to the input signal.

### 7 Parameter setting shortcut

Normally, parameter settings are set by pressing the EDIT key. However, you can also use the shortcut function to set parameters by pressing the EDIT key. For example, if you want to set the "RC" parameter of the COMP module, you can press the EDIT key and the "RC" parameter will be set to 1.0. This shortcut function is useful for setting parameters quickly.

### 8 Volume control with FPD1

When the optional FPD1 is connected to the FPD1 jack, it can be used for adjusting the output volume of the SD1. It can be used for adjusting the output volume of the SD1. It can be used for adjusting the output volume of the SD1.

### 9 Master level adjustment

The SD1 also has a master level adjustment. It can be used for adjusting the master level of the SD1. It can be used for adjusting the master level of the SD1.
