## Apple Emoji Meanings:

**Emoji Speak** Jieun Kiaer, 2023-05-18 Providing an in depth discussion of emoji use in a global context this volume presents the use of emoji as a hugely important facet of computer mediated communication leading author Jieun Kiaer to coin the term emoji speak Exploring why and how emojis are born and the different ways in which people use them this book highlights the diversity of emoji speak Presenting the results of empirical investigations with participants of British Belgian Chinese French Japanese Jordanian Korean Singaporean and Spanish backgrounds it raises important questions around the complexity of emoji use Though emojis have become ubiquitous their interpretation can be more challenging What is humorous in one region for example might be considered inappropriate or insulting in another Whilst emoji use can speed up our communication we might also question whether they convey our emotions sufficiently Moreover far from belonging to the youth people of all ages now use emoji speak prompting Kiaer to consider the future of our communication in an increasingly digital world

**Whose Language Is English?** Jieun Kiaer, 2024-09-17 An exhilarating new account of the English language from British colonialism to the age of social media emphasizing dynamism and democratization Whose language is English Although we often think of it as native to one place today there are many Englishes About seventy five countries are now using English as their official or first language and the number of people speaking it around the world continues to rise But the makeup of the English speaking population is changing The proportion of speakers for whom English is a first language for instance is decreasing due to the explosion in popularity of English as a second language In this ambitious book Jieun Kiaer explores the lives of English words in the twenty first century when the creation and use of language has become an increasingly dynamic interactive and diverse process in which ordinary people have taken leading roles offering such coinages as flexitarian MeToo glow up and shitizen to No sabo kids and beyond As English language grows ever more diverse Kiaer believes we need a paradigm shift We must acknowledge that all varieties of English are languages in their own right when they are used by a community of speakers English is a language that belongs to everyone Considering the effects of social media the Covid 19 pandemic virtual work globalization and artificial intelligence Kiaer paints a compelling portrait of a diffuse rapidly evolving language characterized by creativity and democratization

*Proceedings of the 12th International Conference on Soft Computing and Pattern Recognition (SoCPaR 2020)* Ajith Abraham, Yukio Ohsawa, Niketa Gandhi, M.A. Jabbar, Abdelkrim Haqiq, Seán McLoone, Biju Issac, 2021-04-15 This book highlights the recent research on soft computing and pattern recognition and their various practical applications It presents 62 selected papers from the 12th International Conference on Soft Computing and Pattern Recognition SoCPaR 2020 and 35 papers from the 16th International Conference on Information Assurance and Security IAS 2020 which was held online from December 15 to 18 2020 A premier conference in the field of artificial intelligence SoCPaR IAS 2020 brought together researchers engineers and practitioners whose work involves intelligent systems network security and their applications in industry Including contributions by authors from 40

*The Language of Hallyu* Jieun Kiaer, 2023-07-10 The Language of Hallyu will re examine the language of the Korean Wave by looking at popular K content In doing so it will expose the meanings that get lost in translation hidden under subtitles Over the past decade hallyu the Korean wave has exploded in popularity around the globe K films K drama and K pop were once small subcultures known mostly by Korea's East and Southeast Asian neighbours and Korean diaspora Now K content has entered the international mainstream Consequently interest in Korean language has grown while interest in language learning in general has decreased Many textbooks emphasise that Korean is a polite language but this book will highlight that this is not the case The Language of Hallyu examines popular K content including Parasite 2019 Minari 2020 Squid Game 2021 and Pachinko 2022 The author introduces language stylistics to explain how Koreans style their language to suit every occasion She argues that they do this via a process of visual scanning and social tuning whereby visual clues are assessed in tangent with an individual's sociocultural awareness The author concludes by highlighting the danger of the jondaemal banmal polite casual speech divide demonstrating that Korean language is so much more than polite This book will be of interest to students and researchers in Korean language and culture particularly those interested in linguistics and pragmatics

The Emoji Code Vyvyan Evans, 2017-08-01 Drawing from disciplines as diverse as linguistics cognitive science psychology and neuroscience The Emoji Code explores how emojis are expanding communication and not ending it For all the handwringing about the imminent death of written language emoji those happy faces and hearts is not taking us backward to the dark ages of illiteracy Every day 41.5 billion texts are sent by one quarter of the world using 6 million emoji Evans argues that these symbols enrich our ability to communicate and allow us to express our emotions and induce empathy ultimately making us all better communicators The Emoji Code charts the evolutionary origins of language the social and cultural factors that govern its use change and development as well as what it reveals about the human mind In most communication nonverbal cues are

our emotional expression signal our personality and are our attitude toward our addressee They provide the essential means of nuance and are essential to getting our ideas across But in digital communication these cues are missing which can lead to miscommunication The explosion of emojis in recent years has arisen precisely because it fulfills exactly these functions which are essential for communication but are otherwise absent in texts and emails Evans persuasively argues that emoji add tone and an emotional voice and nuance making us more effective communicators in the digital age *The Emoji Code*

Vyvyan Evans,2017-05-18 The Emoji Code sheds light on emoji's vital role in the expression of emotion in digital communication and more pointing the way for the future of international communication in a provocative and entertaining way *A Framework to Understand Emoji Meaning* Sanjaya Wijeratne,2018 Pictographs commonly referred to as emoji have become a popular way to enhance electronic communications They are an important component of the language used in social media With their introduction in the late 1990's emoji have been widely used to enhance the sentiment emotion and sarcasm expressed in social media messages They are equally popular across many social media sites including Facebook Instagram and Twitter In 2015 Instagram reported that nearly half of the photo comments posted on Instagram contain emoji and in the same year Twitter reported that the face with tears of joy emoji has been tweeted 6.6 billion times As of 2017 Facebook and Facebook Messenger processed over 60 million and 6 billion messages with emoji per day respectively Emogi an Internet marketing firm reports that over 92% of all online users have used emoji at least once Creators of the SwiftKey Keyboard for mobile devices report that they process 6 billion messages per day that contain emoji Moreover business organizations have adopted and now accept the use of emoji in professional communication For example Appboy an Internet marketing company reports that there has been a 777% year over year increase and 20% month over month increase in emoji usage for marketing campaigns by business organizations in 2016 These statistics leave little doubt that emoji are a significant and important aspect of electronic communication across the world The ability to automatically process and interpret text fused with emoji will be essential as society embraces emoji as a standard form of online communication In the same way that natural language is processed with sophisticated machine learning techniques and technologies for many important applications including text similarity and word sense disambiguation emoji should also be amenable to such analysis Yet the pictorial nature of emoji the fact that the same emoji may be used in different contexts to express different meanings and that emoji are used in different cultures over the world which can interpret emoji differently make it especially difficult to apply traditional Natural Language Processing NLP techniques to analyze them Indeed emoji were developed organically with no overt explicit semantics assigned to them This contributed to their flexible usage but also lead to ambiguity Thus similar to words emoji can take on different meanings depending on context and part of speech POS Polysemy in emoji complicates determination of emoji similarity and emoji sense disambiguation However having access to machine readable sense repositories that are specifically designed to capture emoji meaning can play a vital role in

representing contextually disambiguating and converting pictorial forms of emoji into text thereby leveraging and generalizing NLP techniques for processing richer medium of communication This dissertation presents the creation of EmojiNet the largest machine readable emoji sense inventory that links Unicode emoji representations to their English meanings extracted from the Web EmojiNet consists of i 12 904 sense labels over 2 389 emoji which were extracted from reliable online web sources and linked to machine readable sense definitions seen in BabelNet ii context words associated with each emoji sense which are inferred through word embedding models trained over Google News and Twitter message corpora for each emoji sense definition and iii recognizing discrepancies in the presentation of emoji on different platforms and specification of the most likely platform based emoji sense for a selected set of emoji It then discusses the application of emoji meanings extracted from EmojiNet to solve novel downstream applications including emoji similarity and emoji sense disambiguation To address the problem of emoji similarity first it presents a comprehensive analysis of the semantic similarity of emoji through emoji embedding models learned over emoji meanings in EmojiNet Using emoji descriptions emoji sense labels and emoji sense definitions and with different training corpora obtained from Twitter and Google News multiple embedding models are learned to measure emoji similarity Using a benchmark sentiment analysis dataset it further shows that incorporating emoji meanings in EmojiNet into embedding models can improve the accuracy of sentiment analysis tasks by 9 % To address the problem of emoji sense disambiguation it uses word embedding models learned over Twitter and Google News corpora and shows that word embeddings models can be used to improve the accuracy of emoji sense disambiguation tasks The EmojiNet framework its RESTful web services and other benchmarking datasets created as part of this dissertation are publicly released at <http://emojinet.knoesis.org>
