organization however is easier said than done Even more difficult is being a company that continually disrupts Is it possible to discern a code for how companies can achieve this In this highly readable and engaging book a disruptive leadership framework is proposed in which caring deeply is placed at the center of the model Apple is used as the leading example By turning care into a focal point a triphasic model is proposed that moves from the personal sphere individual to the corporate arena organizational and then to the global stage impact Nine key factors are identified along this path for how companies can achieve organizational excellence This second edition updates all the facts data and history around Apple since the first edition and calls out how its revolution of care continues to not only validate its success but astound with its seemingly unfettered upside Its ability to disrupt seems to have no limits thus challenging business leaders present and future to incorporate the DNA of care as they build and scale businesses In addition to the previously profiled companies such as Nike IKEA 3M and Starbucks new case studies including Uniqlo Alibaba On Running 7 Eleven and Costco are presented to supplement Apple s story Features A new organizational model is given for interpreting Apple s success Nine principles of organizational excellence are discerned from this new model Promotes caring deeply as a focal point for approaching disruptive leadership New corporate profiles include Uniqlo Alibaba On Running 7 Eleven and Costco Application questions and assignments are included for each chapter making it an ideal training tool for leadership development and personal application
