**and Peptide-based Biomaterials and their Biomedical Applications** Anwar Sunna,Andrew Care,Peter L. Bergquist,2017-10-26 Solid binding peptides have been used increasingly as molecular building blocks in nanobiotechnology as they can direct the assembly and functionalisation of a diverse range of materials and have the ability to regulate the synthesis of nanoparticles and complex nanostructures Nanostructured materials such as sheet fibril forming peptides and helical coiled coil systems have displayed many useful properties including stimulus responsiveness modularity and multi functionality providing potential technological applications in tissue engineering antimicrobials drug delivery and nanoscale electronics The current situation with respect to self assembling peptides and bioactive matrices for regenerative medicine are reviewed as well as peptide target modeling and an examination of future prospects for peptides in these areas

*Policing and Boundaries in a Violent Society* Guy Lamb,2022-01-31 This book explores how social and territorial boundaries have influenced the approaches and practices of the South Africa Police Service SAPS By means of a historical analysis of South Africa this book introduces a new concept police frontierism which illuminates the nature of the relationships between the police policing and boundaries and can potentially be used for future case study research Drawing on a wealth of research this book examines how social and territorial boundaries strongly influenced police practices and behaviour in South Africa and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary Focusing on cases of high density police operations public order policing and the recent policing of the COVID 19 lockdown this book argues that poor economic conditions combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa This book will be of interest to scholars and students interested in policing in post colonial societies characterised by high levels of violence as well as police work and police militarization **Folded Synthetic**

**Peptides for Biomedical Applications** Alessandro Contini, Jutta Eichler, 2019-09-26 Folded peptides and peptide motifs within proteins are abundant in living organisms where they are essential for the biological activities of the peptides and proteins. During the past decades much research has been dedicated to understanding the rules that govern peptide folding. Simultaneously a range of strategies have been established for the conformational stabilization of bioactive peptides as well as for the de novo design of peptides with defined secondary structures. These methods are either based on the chemical modification of the peptide backbone such as cyclization and stapled peptides or on the use of a range of non proteinogenic amino acids that in a defined sequential arrangement induce secondary structures. Peptides. Such building blocks include D and other non proteinogenic amino acids as well as beta and gamma amino acids. This Research Topic comprises a collection of papers by an international group of 77 scientists with a background in synthetic analytical, computational and medicinal chemistry as well as in biochemistry and pharmacology. Their research is presented here in a total of 11 papers: 8 original research reports and 3 reviews covering diverse aspects of folded synthetic peptides. These studies include the preparation and characterization of new peptide monomers with interesting folding properties; the synthesis and conformational analysis of non natural peptides as well as the use of folded peptidomimetics as molecular switches. Additionally a range of biomedical applications such as antimicrobial, anti-inflammatory, antiangiogenic and immune stimulating activities are also reported. We hope this eBook will be a source of inspiration and knowledge for scientists in various disciplines related to folded peptides and their many applications as well as for those who want to learn more about this fascinating field of research. New Directions in South African Tourism Geographies Jayne M. Rogerson, Gustav Visser, 2019-09-26 This book provides an overview of innovative and new directions being chartered in South African tourism geographies. Within the context of global change the volume explores different facets and different geographies of tourism. Key themes under scrutiny include the sharing economy, the changing accommodation service sector, touring poverty, tourism and innovation, tourism and climate change, threats to sustainability, inclusive tourism and a number of studies which challenge the present mindedness of much tourism geographical scholarship. The 18 chapters range across urban and rural landscapes in South Africa with sectoral studies which include adventure tourism, coastal tourism, cruise tourism, nature based tourism, sports tourism and wine tourism. Finally the volume raises a number of policy and planning issues in the global South in particular relating to sustainability, local economic development and poverty reduction. Outlining the impact of tourism expansion in South Africa and suggesting future research directions, this stimulating book is a valuable resource for geographers as well as researchers and students in the field of tourism studies. Discrimination Law Sandra Fredman FBA KC, 2022-11-28 This book is a challenging, thought provoking yet highly accessible introduction to discrimination law. It takes a thematic approach illuminating the major issues in discrimination law while imparting an in depth understanding of the strengths and weaknesses of legal responses to complex social problems of inequality. This is enhanced by the comparative approach. By

considering equality law in the UK US India Canada and South Africa as well as the European Union and under the European Convention on Human Rights the book exposes common problems across different jurisdictions and canvasses a variety of differing solutions As in the highly successful previous editions the book locates discrimination law within its historical and social context One of its major strengths is the development of an analytic framework of substantive equality drawing on a range of sources and the author s wide experience of equality law in many jurisdictions As well as chapters charting the social challenges and legal responses the book compares the ways in which different jurisdictions formulate grounds of discrimination or protected characteristics the meaning of key concepts such as direct discrimination disparate treatment indirect discrimination disparate impact and when limitations on equality are legitimate Later chapters test these concepts in some of the most challenging contexts pregnancy and parenting equal pay reasonable accommodation and sexual harassment as well as to the particularly controversial issue of affirmative action or deliberate preference policies Discussing at length how racism sexism LGBTQ rights and other topics impact these contexts The final chapter asks how the right to equality can be made more effective critically assessing the paradigm individual complaints model and possible alternatives from class actions and strategic litigation to mainstreaming and positive duties to promote equality
