

CHEMISTRY LAB NOTEBOOK FORMAT

LAB NOTEBOOK

A lab notebook is simply a record of an experiment as it is performed. Your lab notebook should contain enough information about the experiment so that later you, or someone else, can understand what has been done without referring to the lab manual. In your lab notebook, include

- A table of contents (with the title of the lab, the pages, and the date of the experiment). This will be updated for each experiment
- Number the pages in your notebook
- **Important Reminders for a Lab Report**
 - 1) Spelling
 - 2) Avoid personal pronouns
 - 3) Headings should stand out
 - 4) Neatness counts - use rulers when needed (especially when using tables and graphs)

PRELAB

Before coming to the lab each student must be prepared. It is expected that each student has read the lab, copied and read the MSDS safety precautions for the chemicals being used. The MSDS must be submitted by the students on the day of the experiment. It will be signed and dated by the teacher before the lab is completed.

LAB REPORT

Data

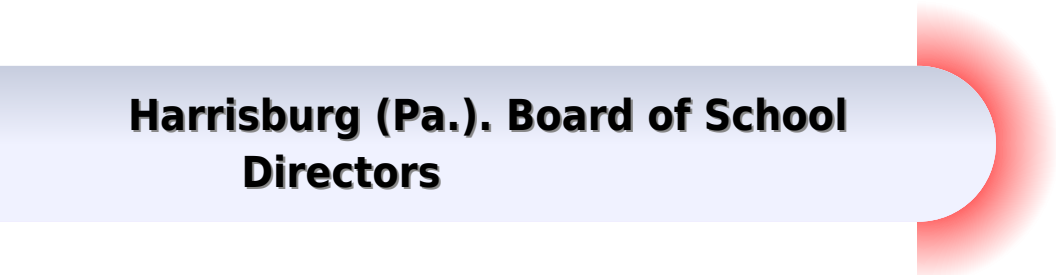

The data section of your report should have a title, date, and include the name of you lab partner. All data should be recorded directly into your lab book as the experiment is being performed. Whenever possible, data should be recorded in tables. Each table should have a title and column headings and units. If a mistake is made in entering data, draw one or two lines through the error(s) and record the correct data. DO NOT erase or white out errors. The data recorded for each experiment should be accurate, detailed, and concise.

Purpose

The purpose of your experiment consists of one or two sentences describing what is being tested, investigated or measured. DO NOT copy the purpose directly from your lab.
