*Applied Intelligent Systems* John Fulcher, 2012-10-16 Humans have always been hopeless at predicting the future most people now generally agree that the margin of viability in prophecy appears to be 1 ten years Even sophisticated research endeavours in this arena tend to go 2 off the rails after a decade or so The computer industry has been particularly prone to bold and often way off the mark predictions for example I think there is a world market for maybe five computers Thomas J Watson IBM Chairman 1943 I have traveled the length and breadth of this country and talked with the best people and I can assure you that data processing is a fad that won't last out the year Prentice Hall Editor 1957 There is no reason why anyone would want a computer in their home Ken Olsen founder of DEC 1977 and 640K ought to be enough for anybody Bill Gates CEO Microsoft 1981 3 The field of Artificial Intelligence right from its inception has been particularly plagued by bold prediction syndrome and often by leading practitioners who should know better AI has received a lot of bad press 4 over the decades and a lot of it deservedly so How often have we groaned in despair at the latest by the year 20xx we will all have insert your own particular hobby horse here e g *Intelligent Agents in the Evolution of Web and Applications* Ngoc Thanh Nguyen, Lakhmi C Jain, 2009-01-17 Intelligent agents have revolutionised the way we do business we teach we learn design systems and so on Agent applications are increasingly being developed in mains as diverse as meteorology manufacturing war gaming UAV mission management and the evolution of Web 1 The Web has also has the same effect on our daily life as the intelligent agents We use Web for information search shopping news communication and so on We wonder how we lived without Web in the past 2 The book presents a sample of some of the most innovative research on the use of intelligent agents in the evolution of Web There are thirteen chapters in the book Chapters are on theoretical foundations as well as practical applications We are grateful to the contributors and reviewers for their contribution We believe that the research reported in the book will encourage researchers to develop the robust human like intelligent machines for the service of humans We sincerely thank Springer Verlag for their editorial support during the preparation of the manuscript The editors appreciate the resources provided by Wroclaw University of Technology and the University of South Australia to edit this volume
