### **The Complete Guide to the Theory and Practice of Materials**

**Development for Language Learning** Brian Tomlinson, Hitomi Masuhara, 2017-07-17. The Complete Guide to the Theory and Practice of Materials Development for Language Learning provides undergraduate and graduate level students in applied linguistics and TESOL researchers, materials developers and teachers with everything they need to know about the latest theory and practice of language learning materials development. The past two decades have seen historic change in the field of language learning materials development. The four main drivers of that change include a shift in emphasis from materials for language teaching to language learning, evidenced based development, the huge increase in digital delivery technologies and the wedding of materials developed for the learning of English with those for other second or foreign languages. Timely, authoritative and global in scope, this text represents the ideal resource for all those studying and working in the field of language learning.

### **Practice and Theory for Materials Development in L2 Learning** Alan Maley, Hitomi Masuhara, Freda Mishan, 2017-03-07.

This volume represents a unique addition to the growing body of empirical literature on materials development, adopting a reverse approach to the topic. Rather than applying theory to practice, practitioners and researchers from 11 countries reappraise applied linguistics theories through practice. The book also provides evidence for the diversity of materials development around the globe at different levels for different specialities and for different purposes. Each chapter surveys the relevant literature such as task based learning and language and culture, describes a specific research project, reports the results of the project and discusses the implications of these results for the development of materials both in the local context and in general. After each section there are editorial comments highlighting the issues emerging from the research and there is a conclusion which connects the findings of the various chapters and makes suggestions both for future research and for the principled development of materials for L2 learners. The book will be suitable for teachers, materials developers, academics and students in post graduate courses in applied linguistics in TEFL, TESOL and in the teaching of other languages as an L2.

*Materials development for TESOL* Freda Mishan,2015-06-03 Materials development has become much more important in the field of TESOL in the last twenty years modules on materials development are now commonplace on MA TESOL courses around the world The overall aim of the

book is to introduce readers to a wide range of perspectives on language learning materials development. Freda Mishan, Angela Chambers, 2010. Language learning materials development remains a surprisingly under supported aspect of language teaching. This book constitutes a much needed resource in the area aiming to support and advance the craft of materials design. The volume offers a snapshot of the contemporary influences on language learning materials development from diverse perspectives around the globe. These influences include the demands of teaching ESOL in Britain and Ireland, the impact of Corpus Linguistics, the needs of young learners and of diverse worldwide audiences, the development of intercultural competence as well as the integration of L2 acquisition research. Contributors to the volume are drawn from a broad range of teaching research and materials development backgrounds. The book includes some chapters based on papers given at the MATSDA Materials Development Association 2008 conference, *Authenticity in Materials Development for Language Learning*. Alan Maley, Brian Tomlinson, 2017-11-06. This volume makes a unique contribution to the literature on materials development for language learning. It focuses on issues related to authenticity in materials development and includes research based position statements, applications of theory to practice and developments of theory from observed practice. Each paper concentrates on a different aspect of authenticity and many of them introduce the reader to previously unexplored facets of authenticity. The chapters are sequenced so that the book moves from general discussion about the value of authenticity to reports of evaluations of authenticity to reports of the exploitation of authenticity in specific learning contexts. Many questions are raised, much revealing data is reported and analysed and many pedagogic suggestions are made. The contributions here have been written so that they are of potential value to teachers, to materials developers, to post graduate students and to researchers. They are written to be academically rigorous but at the same time to be accessible to newcomers to the field and to experienced experts alike.
