references given therein Rather the emphasis in the present handbook is on technique and we are indeed fortunate that a number of eminent applied mathematicians have been willing to share with us their interpretations and experiences To avoid the necessity of frequent and disruptive cross referencing it is expected that the reader will make full use of the index Moreover each chapter has been made as self sufficient as is feasible This procedure has resulted in occasional duplication but as compensation for this the reader may appreciate the availability of different points of view concerning certain topics of current interest As editor I would like to express my appreciation to the contributing authors to the reviewers to the editorial staff of the publisher and to the many secretaries and typists who have worked on the manuscript without the partnership of all of these people this handbook would not have been possible
