Lens Design Fundamentals Rudolf Kingslake, 2012-12-02 A large part of this book is devoted to a study of possible design procedures for various types of lens or mirror systems with fully worked examples of each The reader is urged to follow the logic of these examples and be sure that he understands what is happening noticing particularly

how each available degree of freedom is used to control one aberration Not every type of lens has been considered of course but the design techniques illustrated here can readily be applied to the design of other more complex systems It is assumed that the reader has access to a small computer to help with the ray tracing otherwise he may find the computations so time consuming that he is liable to lose track of what he is trying to accomplish Journal of the Optical Society of America ,1930

The Optician and Scientific Instrument Maker ,1929 Journal of the Optical Society of America Optical Society of America,1930 *A Practical Guide to Optical Metrology for Thin Films* Michael Quinten,2012-09-24 A one stop concise guide on determining and measuring thin film thickness by optical methods This practical book covers the laws of electromagnetic radiation and interaction of light with matter as well as the theory and practice of thickness measurement and modern applications In so doing it shows the capabilities and opportunities of optical thickness determination and discusses the strengths and weaknesses of measurement devices along with their evaluation methods Following an introduction to the topic Chapter 2 presents the basics of the propagation of light and other electromagnetic radiation in space and matter The main topic of this book the determination of the thickness of a layer in a layer stack by measuring the spectral reflectance or transmittance is treated in the following three chapters The color of thin layers is discussed in chapter 6 Finally in chapter 7 the author discusses several industrial applications of the layer thickness measurement including high reflection and anti reflection coatings photolithographic structuring of semiconductors silicon on insulator transparent conductive films oxides and polymers thin film photovoltaics and heavily doped silicon Aimed at industrial and academic researchers engineers developers and manufacturers involved in all areas of optical layer and thin optical film measurement and metrology process control real time monitoring and applications **The Instrument World** ,1929 Transactions of the Optical Society, London Optical Society (Great Britain),1926 **Applied Optics and Optical Design** Alexander Eugen Conrady,1992 **Transactions** Optical Society (Great Britain),1926 **Transactions of the Optical Society** Optical Society (Great Britain),1929 Spectroscopic Instrumentation Thomas Eversberg,Klaus Vollmann,2014-11-10 In order to analyze the light of cosmic objects particularly at extremely great distances spectroscopy is the workhorse of astronomy In the era of very large telescopes long term investigations are mainly performed with small professional instruments Today they can be done using self designed spectrographs and highly efficient CCD cameras without the need for large financial investments This book explains the basic principles of spectroscopy including the fundamental optical constraints and all mathematical aspects needed to understand the working principles in detail It covers the complete theoretical and practical design of standard and Echelle spectrographs Readers are guided through all necessary calculations enabling them to engage in spectrograph design The book also examines data acquisition with CCD cameras and fiber optics as well as the constraints of specific data reduction and possible sources of error In closing it briefly highlights some main aspects of the research on massive stars and spectropolarimetry as an extension of spectroscopy The book offers a comprehensive

introduction to spectroscopy for students of physics and astronomy as well as a valuable resource for amateur astronomers interested in learning the principles of spectroscopy and spectrograph design The Photographic Journal ,1929 Vols for 1853 include the transactions of the Royal Photographic Society of Great Britain *Journal of the Photographic Society of London* ,1929 Vols for 1853 include the transactions of the Royal Photographic Society of Great Britain *Design and Engineering of Optical Systems* Joseph J.
