*The Arms Race in Asia* Andrew T.H. Tan,2013-12-13 This book is the first systematic examination of the emerging arms race in Asia The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East the two largest arms export markets in the world Of these two regions Asia has become particularly significant led by the emergence of China and India as major powers It is therefore not surprising that the rapid military modernisation in Asia accompanied by significant increases in the size and sophistication of armed forces has generated attention as to its trends key characteristics causes and implications This phenomenon which has become evident since the end of the Cold War has also been widely described as an Asian arms race

This book evaluates the key conceptual ideas which can shed light on this phenomenon as well as examining the complex mix of internal external and technological factors that have led to its emergence The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape a loose bloc of US allies in the region a counter bloc of potential US adversaries and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments The Arms Race in Asia concludes that if the emerging arms race is left unchecked it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars The book will be of great interest to students of Asian politics strategic studies defence studies security studies and IR in general

*Decolonizing Global Intelligence* Pak Nung Wong,2025-07-24 From September 11 to the calamitous withdrawal of United States troops from Afghanistan Western intelligence has failed to negotiate the largest military and humanitarian crises across the world This book proposes to decolonize global intelligence from the peripheries of the Global South and put forward a new intelligence practice of inclusive statecraft It shows how dominant Western intelligence systems have failed to protect the very ideas they promised to uphold and the discrepancy between the West's Responsibility to Protect R2P liberalist doctrine and the realist on the ground complex reality as observed by the Failure to Protect F2P scholarships Drawing theoretical insights and empirical both historical and contemporary materials from a wide array of case studies of Western and non Western intelligence settings and practices as well as their interactions it argues that the next generation of global security and intelligence practitioners will necessitate genuine interracial non anthropocentric and cross cultural inclusivity especially the capability to take the non Western intelligence cultures and their realist strategic thoughts seriously This book will not just add new knowledge to the larger field of security and intelligence studies but will also pioneer the relatively underdeveloped fields of comparative intelligence cultures and interstellar intelligence cultural studies It will be indispensable for policymakers bureaucrats and government officials

*The AStruggle for Freedom from Fear* Alison Brysk,2018-08-01 How can we understand and contest the global wave of violence against women In this book Alison Brysk shows that gender violence across countries tends to change as countries develop and liberalize but not in the ways that we might predict She shows how liberalizing authoritarian countries and transitional democracies may experience more shifting patterns and greater levels of violence than less developed and democratic countries due to changes and uncertainties in economic and political structures While a combination of international action law public policy civil society mobilization and changes in social values work to decrease gender violence Brysk assesses the potential limits and balance of these measures

,2013 **Small Boats, Weak States, Dirty Money** Martin N. Murphy,2009 Many believe that pirates and other water bound terrorists present a significant threat to international maritime security Testing the validity of this claim Martin N Murphy scrutinizes recent incidents of maritime terrorism and locates the commonalities between pirates and maritime terrorists that enable them to commit their extensive crimes Murphy s research opens up surprising sites of contact between pirates and wider criminal networks organizations that pursue their corrupt agendas not only on sea but also on land It is these relationships Murphy argues that bring about the destabilization of states and regions in which piracy occurs Murphy s most significant revelation is the way in which maritime criminality may disguise insurgent and terrorist activity allowing such actors greater freedom to maneuver Although these acts currently rank as a low level threat piracy feeds off of political upheaval Before they can evolve into a truly powerful and dangerous force however maritime terrorists and insurgents will have to overcome significant operational and technical issues They must also capture the attention of an international audience by committing atrocities at sea that are as devastating as those committed on land *Radio News* ,1927 Some issues 1943 July 1948 include separately paged and numbered section called Radio electronic engineering edition called Radionics edition in 1943 **International Who's who in Classical Music** ,2009 **Who Owns Whom** ,1992
