Beads of the World Peter Francis, 1994 Beads are the oldest and most widespread form of art They have been made from all materials in every corner of the globe Their uses are innumerable They do not just decorate people but many other things as well Moreover they function as status symbols magic charms and are helpful to us in many other ways While there have always been people interested in beads the lack of information on them has restricted their collecting A few years ago there were only a handful of small bead societies and very little on beads in print That is now changing rapidly bead societies are being formed at an astounding rate around the U S and abroad As with all collectibles as interest in them grows scarce beads rise in price What has caused the boom in bead collecting is that today there are far more resources for collectors than ever These include bead societies bead conferences and other support groups as well as much more published information The author of this book is responsible for a great deal of this Though there are other books on beads *Beads of the World* is unique for two reasons For one it covers the universe of collectible beads including beads made especially for trade and those produced locally for personal use Moreover it is written in a highly accessible style from extensive personal first hand knowledge Much of this book is the author's own work It distills years of research to bring a comprehensive global view of beads to beginning and experienced collectors and other students of humanity The detailed Appendix and Notes sections open up the fascinating bead world to newcomers and document past research for advanced collectors The first bead price guide ever published will also prove useful
