**Introducing the New Sexuality Studies** Nancy L. Fischer, Laurel Westbrook, Steven Seidman, 2022-06-07 Introducing the New Sexuality Studies Original Essays is an innovative reader friendly collection of essays that introduces the field of sexuality studies to undergraduate students. Examining the social cultural and historical dimensions of sexuality this collection is designed to serve as a comprehensive yet accessible textbook for sexuality courses at the undergraduate level. The fourth edition adds 51 new essays whilst retaining 33 of the most popular essays from previous editions. It features perspectives that are intersectional, transnational, sex positive and attentive to historically marginalized groups along multiple axes of inequality including gender, race, class, ability, body size, religious identity, age, and of course, sexuality. Essays explore how a wide variety of social institutions including medicine, religion, the state, and education shape sexual desires, behaviors, and identities. Sources of and empirical research on oppression are discussed along with modes of resistance, activism, and policy change. The fourth edition also adds new user friendly features for students and instructors. Keywords are italicized and defined, and each chapter concludes with review questions to help students ascertain their comprehension of key points. There is also an online annotated table of contents to help readers identify key ideas and concepts at a glance for each chapter.

*Romancing the Margins?* Gabriele Griffin, 2000 Explores the dynamics and definitions of Lesbian and Female Bisexual writing throughout this decade. It explains the challenges of being gay and minority and recent efforts to eliminate racist and anti gay themes in writing, encapsulating the sense of liberation and uncertainty in the advancement of lesbian movements and theories.

Engaging Undergraduates in Publishable Research: Best Practices Traci A. Giuliano, Jeanine L. M. Skorinko, Marianne Fallon, 2019-11-20 Although many articles and books have been written about conducting research with undergraduates, there is a dearth of research on the process of publishing with undergraduates. Thus, in this research topic, we assembled a collection of 43 articles from 98 researchers worldwide who are passionate about and have had success in publishing high quality peer reviewed journal articles with undergraduates. The diverse articles represent a wide range of practices to help researchers publish with undergraduates, including structuring the curriculum to promote undergraduate research and publication, optimizing research experiences for undergraduates, training students in implementing advanced techniques, accessing special populations, or conducting research in off campus settings, addressing institutional and career challenges for faculty, and increasing inclusion and diversity. Each article provides a unique and diverse perspective that nevertheless resonates across contexts and situations. We hope that the ideas, models, techniques, and practices in these articles will motivate and inspire readers to begin, continue, or rethink how they engage undergraduates in publishable research. We also hope to stimulate empirical and quantitative research on the effectiveness of these ideas, models, techniques, and practices.

**Love and Freedom** Jorge N. Ferrer, 2021-06-24 In *Love and Freedom*, Jorge Ferrer proposes a paradigm shift in how romantic relationships are conceptualized, a step forward in the evolution of modern relationships. In the same

way that the transgender movement surmounted the gender binary Ferrer defines how a parallel step can and should be taken with the relational style binary This book offers the first systematic discussion of relationship modes beyond monogamy and polyamory as well as introduces the notion of relational freedom as the capability to choose one's relational style free from biological psychological and sociocultural conditionings To achieve these goals Ferrer first discusses a number of critical categories specifically monopride polyphobia and polypride monophobia that mediate the contemporary mono poly wars that is the predicament of mutual competition among monogamists and polyamorists The ideological nature of these mono poly wars is demonstrated through a review of available empirical literature on the psychological health and relationship quality of monogamous and polyamorous individuals and couples Then after showing how monogamy and polyamory ultimately reinforce each other Ferrer articulates three relational pathways to living in between through and beyond the mono poly binary fluidity hybridity and transcendence Moving beyond that binary opens a fuzzy liminal and multivocal relational space that Ferrer calls novogamy In this groundbreaking book readers will learn practical tools to not only transform jealousy but also enhance their relational freedom while being aware of key issues of diversity and social justice They will also learn novel criteria to evaluate the success of their intimate relationships and be introduced to a transformed vision of romantic love beyond both monocentrism and emerging polynormativities
