A Study Of Interpersonal Relations:

A Study of Interpersonal Relations Patrick Mullahy, 1949 *Conflict, Power, and Games* James T. Tedeschi, Barry R. Schlenker, Thomas V. Bonoma, 2011-12-31 The technological revolution in the social sciences made available a set of research tools and data manipulation techniques that permit the study of complex social processes previously inaccessible or not amenable to our observational powers One important set of tools took the generic title experimental games which were characterized by the interactive protagonists pursuit of relatively well defined goals whose achievement is dependent on the behavior of others James T Tedeschi Barry R Schlenker and Thomas V Bonoma in this work explicate these highly structured interactions The grand strategy of scientific inquiry is the development of explanatory systems for natural phenomena The empirical tactics devised to manipulate control observe and measure events or processes of interest often require as much ingenuity and imagination as theory development itself Generally the situation is so structured that certain rules govern participant behavior Within these constraints the social psychological processes of conflict influence power bargaining and coalition formation can be studied Concerned with the more formal and technical aspects of games the authors explain how they are used for purposes of developing and testing scientific theory The emphasis throughout is on the development and empirical evaluation of a scientific theory of social influence and power in situations where the interests of the interacting parties are in conflict Experimental games have provided many of the concepts and the preponderance of evidence that have helped to unravel many of the complexities of social behavior In *Conflict Power and Games* the authors build a bridge between technical and non technical approaches in order to shed greater light on interpersonal relations **A Study of Interpersonal Relations Within Families** Craig House for Children, 1966 **Studying Interpersonal Interaction** Barbara M. Montgomery, Steve Duck, 1993-11-01 This volume presents a comprehensive critical examination of current research methods used to study human social behavior as it occurs in interpersonal settings such as families acquaintanceships friendships and romantic partnerships Multidisciplinary in approach the book s chapters are written by leading figures in communication social psychology sociology and family studies who explore the methodological choices a researcher must make in order to study interpersonal interaction To permit clear comparison all chapters in this volume reference the same common research problem to develop examples illustrate controversial issues and describe the potential of the particular method under discussion Written in an accessible style chapters openly discuss the strengths and weaknesses of each method consider underlying philosophy and assumptions and note limitations as well as advantages The result is an originally crafted work that offers readers a unique way to learn about compare and ultimately judge the many methods presently available to the researcher or student of interpersonal interaction Part I considers the assumptions researchers must make about the nature of a social interaction in order to study it Chapters address issues related to formulating research problems choosing a research paradigm determining a viewpoint participant peer or observer from

which to gather data deciding on appropriate levels and units of analysis incorporating time and assessing the mutual adaptation that characterizes interpersonal communication Part II focuses on procedures for gathering data These include using accounts and narratives logs and diaries retrospective self reports discourse records direct observation and experimentation Part III highlights new and newly re discovered methods for analyzing interaction data Assuming that the reader is familiar with traditional regression and mean differences approaches chapters build on this knowledge base to discuss content analysis tests of sequential association in categorical data ways of dealing with interdependence in dyadic data and longitudinal analytic techniques such as time series analysis phasic analysis and meta analysis The book concludes with a chapter that both summarizes previous chapters and convincingly argues for methodological pluralism Encompassing the broad range of central concerns in designing research studies from conceptualization through assessment to data analysis this book is an ideal reference source for all those engaged in actual research projects It is also highly valuable for advanced undergraduate and graduate methods courses

A Study of Interpersonal Relations Among a Group of Adolescent Girls Marian Agnes Leo,1948

Interpersonal Communication Pamela J. Kalbfleisch,2013-09-13 Interpersonal relationships are the core of our societal system and have been since before the dawn of civilization In today s world friends lovers companions and confidants make valuable contributions to our everyday lives These are the relationships whose members are not automatically participants as a result of their birth and kin affiliations The focus is on these relationships that must be forged from the sometimes indifferent and sometimes hostile world Yet there is still much that is not known about how these relationships evolve how partners communicate in on going relationships how people keep their relationships together and how they cope when they fall apart Primary to the focus of this book is the underlying theme of evolving interpersonal relationships from the initial encounter to the mature alliance The contributors to this volume provide a contemporary perspective for the study of interpersonal relationships Fresh areas of scholarly inquiry are presented and existing approaches are re examined Research in the introductory chapters breaks new ground and appraises the ultimate question of what impact initial interactions have on further relational development The mid section of the volume concerns communication issues that confront the members of a relationship in process focusing on how conflict and jealousy are communicated to a relational partner This research considers relational development as well as obstacles and barriers to evolving relationships The concluding chapters probe the question Ultimately do all good things have to come to an end Employing innovative techniques to examine maturing and disengaging relationships the research presented here focuses on how interpersonal relationships become committed and

New Contributions to Psychiatry. Edited and with an Introduction by P. Mullahy* Patrick MULLAHY,1958 *The Dynamics of Bureaucracy* Peter M. Blau,1963 **A Study of the Impact of Openness and Trust on the Quality of Interpersonal Relations Within Organizations** Hardeep Singh Anant,2016

Organizational efficiencies and effectiveness significantly depend on the motivation involvement and efforts of employees across all levels Employee performance however is affected by the quality of interpersonal communications within the organization which plays a key role in influencing relationships teamwork conflict resolution and motivation Therefore we need to study interpersonal communication within organizations in order to augment our understanding of the key issues within the field of Organizational Behavior This exploratory study of interpersonal communication involved 368 randomly selected employees across three different levels from ten service sector organizations The objective of the study was to investigate the role of several key variables that are known to affect interpersonal communication and to identify possible themes for future research The data quantitative and qualitative was collected with the help of elaborate questionnaires and interviews then tabulated and analysed by applying relevant tests like Chi Square ANOVA and Regression Analysis generating intriguing findings This paper focuses on the quality of the interpersonal relationships of the employees surveyed and the role of key variables like Trust and Openness in affecting the perceived quality of these relationships While the study found a positive relation between openness and the quality of interpersonal relationships within the organizations surprisingly it did not find a significant relation between trust and the quality of interpersonal relations This seems to suggest that within organizations the quality of interpersonal relationships across the levels is influenced more by perceptions of openness than by the levels of trust between employees
