Handbook of Research on Study Abroad Programs and Outbound Mobility Velliaris, Donna M., Coleman-George, Deb, 2016-08-24 Millions of students seek short and long term study abroad options every year and this trend is a key illustration of the internationalization of higher education. Because a global perspective has become mandatory in the largely globalized workforce many institutions look to study abroad programs to prepare their students. This outbound mobility has the potential to contribute to greater understanding between cultures, countries and individuals. The Handbook of Research on Study Abroad Programs and Outbound Mobility offers a comprehensive look into motivations for and opportunities through all forms of outbound mobility programs. By providing empirically based research this publication establishes the benefits, difficulties and rewards of building a framework to support international students and programs. It is an invaluable resource for academics, students, policy makers, course developers, counselors and cross cultural student advisors.

The Handbook of Dialectology Charles Boberg, John Nerbonne, Dominic Watt, 2018-01-04 The Handbook of Dialectology provides an authoritative up to date and unusually broad account of the study of dialect in one volume. Each chapter reviews essential research and offers a critical discussion of the past, present and future development of the area. The volume is based on state of the art research in dialectology around the world, providing the most current work available with an unusually broad scope of topics. Provides a practical guide to the many methodological and statistical issues surrounding the collection and analysis of dialect data. Offers summaries of dialect variation in the world's most widely spoken and commonly studied languages, including several non-European languages that have traditionally received less attention in general discussions of dialectology. Reviews the intellectual development of the field, including its main theoretical schools of thought and research traditions, both academic and applied. The editors are well known and highly respected with a deep knowledge of this vast field of inquiry.

World Regional Geography without Subregions Lydia Mihelic Pulsipher, Alex Pulsipher, Patricia L. Price, 2013-12-20. Alone among books for the regional geography course, Pulsipher and Pulsipher's World Regional Geography humanizes geographical issues, showing how larger geographical forces affect the lives of individuals and communities around the globe. Students explore the field's defining concepts by focusing on the stories of real people, global trends and interregional linkages and contemporary topics that transcend regional borders: the war on terrorism, global political order, interregional trade, the global economy, popular culture, the environment and the Internet. Along with a thorough updating, this edition introduces several new features that will help students explore geography across regions while enhancing the book's standing as the most highly visual textbook for the world regional course.

The Sound of Exclusion Christopher Chávez,2021-12-21 As a network that claims to represent the nation NPR asserts unique claims about what it means to be American In The Sound of Exclusion Christopher Ch vez critically examines how National Public Radio conceptualizes the Latinx listener arguing that NPR employs a number of industry practices that secure its position as a white public space while relegating Latinx listeners to the periphery These practices are tied to a

larger cultural logic Latinx identity is differentiated from national identity which can be heard through NPR's cultivation of an idealized dialect situating whiteness at its center Pushing Latinx listeners to the edges of public radio has crucial implications for Latinx participation in civic discourses as identifying who to include in the public audience necessarily involves a process of exclusion Ch vez analyzes NPR as a historical product that has evolved alongside significant changes in technology industry practice and demography In The Sound of Exclusion Ch vez asks these pressing questions What kind of news organization was NPR intended to be What has it become over time In what ways is it evolving to meet the needs of a nation in which U.S. Latinxs are becoming an increasingly larger portion of the American public that NPR serves Informed by more than fifty in-depth interviews conducted with public radio practitioners from all aspects of the business Ch vez addresses how power is enacted in everyday broadcast practices By interrogating industry practices we might begin to reimagine NPR as a public good that serves the broad and diverse spectrum of the American public

Prescription and

Tradition in Language Ingrid Tieken-Boon van Oostade, Carol Percy, 2016-11-14 This book contextualises case studies across a wide variety of languages and cultures crystallising key interrelationships between linguistic standardisation and prescriptivism and between ideas and practices It focuses on different traditions of standardisation and prescription throughout the world and addresses questions such as how nationalistic idealisations of traditional language persist or shift amid language change linguistic variation and multilingualism The volume explores issues of standardisation and the sociolinguistic phenomenon of prescription as a formative influence on the national standard language as well as the interconnections between these in a wide range of geographical contexts It balances the otherwise strong emphasis on English in English language publications on prescriptivism and breaks new ground with its multilingual approach across languages and nations The book will appeal to scholars working within different linguistic traditions interested in questions relating to all aspects of standardisation and prescriptivism
