## Buell Manual:

Teacher's Manual John Henry Moore, George Washington Miner, 1903    The Volta Review, 1929    Civil War Field Artillery Earl J. Hess, 2022-10-05 The American Civil War saw the creation of the largest most potent artillery force ever deployed in a conflict fought in the Western Hemisphere. It was as sizable and powerful as any raised in prior European wars. Moreover Union and Confederate artillery included the largest number of rifled pieces fielded in any conflagration in the world up to that point. Earl J. Hess's Civil War Field Artillery is the first comprehensive general history of the artillery arm that supported infantry and cavalry in the conflict. Based on deep and expansive research it serves as an exhaustive examination with abundant new interpretations that reenvision the Civil War's military. Hess explores the major factors that affected artillerists and their work including the hardware the organization of artillery power relationships between artillery officers and other commanders and the influence of environmental factors on battlefield effectiveness. He also examines the lives of artillerymen the use of artillery horses manpower replacement practices effects of the widespread construction of field fortifications on artillery performance and the problems of resupplying batteries in the field. In one of his numerous reevaluations Hess suggests that the early war practice of dispersing guns and assigning them to infantry brigades or divisions did not inhibit the massing of artillery power on the battlefield and that the concentration system employed during the latter half of the conflict failed to produce a greater concentration of guns. In another break with previous scholarship he shows that the efficacy of fuzes to explode long range ordnance proved a problem that neither side was able to resolve during the war. Indeed cumulative data on the types of projectiles fired in battle show that commanders lessened their use of the new long range exploding ordnance due to bad fuzes and instead increased their use of solid shot the oldest artillery projectile in history.

**Patterson's American Educational Directory** Homer L. Patterson, 1927    **The United States and Cuba** Jules Robert Benjamin, 1977-11-15 From its independence from Spain in 1898 until the 1960s Cuba was dominated by the political and economic presence of the United States. Benjamin studies this unequal relationship through 1934 by examining U.S. trade investment and capital lending Cuban institutions and social movements and U.S. foreign policy. Benjamin convincingly argues that U.S. hegemony shaped Cuban internal politics by exploiting the island's economy dividing the nationalist movement co-opting Cuban moderates and robbing post 1933 leadership of its legitimacy.
