Building Structures Illustrated Patterns Systems And Design:

Building Structures Illustrated Francis D. K. Ching, Barry S. Onouye, Douglas Zuberbuhler, 2013-11-19 A new edition of Francis D K Ching's illustrated guide to structural design. Structures are an essential element of the building process yet one of the most difficult concepts for architects to grasp. While structural engineers do the detailed consulting work for a project, architects should have enough knowledge of structural theory and analysis to design a building. *Building Structures Illustrated* takes a new approach to structural design, showing how structural systems of a building such as an integrated assembly of elements with pattern proportions and scale are related to the fundamental aspects of architectural design. The book features a one-stop guide to structural design in practice, a thorough treatment of structural design as part of the entire building process, and an overview of the historical development of architectural materials and structures. Illustrated throughout with Ching's signature line drawings, this new Second Edition is an ideal guide to structures for designers, builders, and students. Updated to include new information on building code compliance, additional learning resources, and a new glossary of terms. Offers thorough coverage of formal and spatial composition, program fit, coordination with other building systems, code compliance, and much more. Beautifully illustrated by the renowned Francis D K Ching, *Building Structures Illustrated* Second Edition is the ideal resource for students and professionals who want to make informed decisions on architectural design.

Building Structures Illustrated Francis D. K. Ching, Barry S. Onouye, Douglas Zuberbuhler, 2011-11-30 Francis D K Ching brings his trademark presentation to the structural design studio with this major new work, co-authored by Barry Onouye and Douglas Zuberbuhler. Taking a new approach to structural design, Ching and his co-authors show how structural systems of a building as an integrated assembly of elements with pattern proportions and scale are related to the essential aspects of architectural design: formal and spatial composition, program fit, coordination with other building systems such as enclosure and mechanical systems, code compliance, etc. No other work by Francis D K Ching brings together so many aspects of architectural design as an integrated reference. Designers, builders, and students alike will gain a new understanding of structural principles and planning without the need for mathematics. Using Ching's trademark presentation, *Structural Patterns* is illustrated throughout with line drawings to present the essential presence of structural systems in buildings but also helps the reader make informed decisions for architectural design.

Building Structures Illustrated Francis D. K. Ching, Barry S. Onouye, Douglas Zuberbuhler, 2008-12-24 Bestselling reference by reknowned authors of architectural design.
