Building Construction Madan Mehta, Walter Scarborough, Diane Armpriest, 2008 The authors have combined their diverse professional and educational backgrounds to produce a resource that presents the complexity of building construction in an accessible volume. It clearly provides the basics of building science as applied to the art of transforming materials and systems into constructible buildings. The book appropriately addresses each of the primary building assemblies foundations walls floors ceilings and roofs and how they join seal and integrate with other components. The performance of building enclosures and systems is reviewed in detail which enhances the reader's understanding of the comprehensive integrated nature of the building design and construction process. Almost all building materials and systems have been covered in depth. The book is unique among other books on the subject because it is joining efforts of three authors two of whom are engaged full time in academia and the third who has an extensive background in the profession. Offers a new approach to construction principles materials and methods. Divided into two parts to illustrate current and traditional practices of construction. Part I 10 chapters deal primarily with the principles of building materials and building assemblies performance. Part II 25 chapters deal primarily with specific materials and assemblies. This book will serve as an indispensable reference for practitioners of architecture engineering and construction.

Building Construction: Principles, Materials and Systems Charles Bale, 2021-11-16 The process of constructing an infrastructure or building is known as construction. It deals with the planning designing and financing of the construction project. The various sectors into which construction can be classified are buildings infrastructure and industrial. The construction of buildings is divided further into commercial or institutional buildings and residential buildings. Some of the steps which are a part of the process of constructing buildings are developing floor plans excavating the foundation and building the main load bearing structure. Finally there is an interrelation and overlap of different fields in order to ensure that the building is structurally sound financially possible to build and fulfill the legal requirements. This book provides significant
