## **Building Resilience Social Capital In Post Disaster Recovery:**

**Building Resilience** Daniel P. Aldrich, 2012-08-15 The factor that makes some communities rebound quickly from disasters while others fall apart A fascinating book on an important topic E L Hirsch in Choice Each year natural disasters threaten the strength and stability of communities worldwide Yet responses to the challenges of recovery vary greatly and in ways that aren't explained by the magnitude of the catastrophe or the amount of aid provided by national governments or the international community The difference between resilience and disrepair as Daniel P Aldrich shows lies in the depth of communities social capital Building Resilience highlights the critical role of social capital in the ability of a community to withstand disaster and rebuild both the infrastructure and the ties that are at the foundation of any community Aldrich examines the post disaster responses of four distinct communities Tokyo following the 1923 earthquake Kobe after the 1995 earthquake Tamil Nadu after the 2004 Indian Ocean Tsunami and New Orleans post Katrina and finds that those with robust social networks were better able to coordinate recovery In addition to quickly disseminating information and financial and physical assistance communities with an abundance of social capital were able to minimize the migration of people and valuable resources out of the area With governments increasingly overstretched and natural disasters likely to increase in frequency and intensity a thorough understanding of what contributes to efficient reconstruction is more important than ever Building Resilience underscores a critical component of an effective response

**Resettlement Challenges for Displaced Populations and Refugees** Ali Asgary, 2018-08-16 The main focus of this book is to help better understand the multidimensionality and complexity of population displacement and the role that reconstruction and recovery knowledge and practice play in this regard According to the UN Refugee Agency UNHCR the total number of people forcibly displaced due to wars and conflicts disasters and climate change worldwide exceeded 66 million in 2016 Many of these displaced populations may never be able to go back and rebuild their houses communities and businesses This text brings together recovery and reconstruction professionals researchers and policy makers to examine how displaced populations can rebuild their lives in new locations and recover from disasters that have impacted their livelihoods and communities This book provides readers with an understanding of how disaster recovery and reconstruction knowledge and practice can contribute to the recovery and reconstruction of displaced and refugee populations This book will appeal to students researchers and professionals working in the field

*Handbook of Disaster Research* Havidán Rodríguez, William Donner, Joseph E. Trainor, 2017-11-16 This timely Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research It provides an interdisciplinary approach to disasters with theoretical methodological and practical applications Attention is given to conceptual issues dealing with the concept disaster and to methodological issues relating to research on disasters These include Geographic Information Systems as a useful research tool and its implications for future research This seminal work is the first interdisciplinary collection of disaster research as it stands now while

outlining how the field will continue to grow      Routledge Handbook of Environmental Hazards and Society Tara K. McGee, Edmund C. Penning-Rowsell, 2022-06-30 This Handbook provides a state of the science review of research and practice in the human dimensions of hazards field The Routledge Handbook of Environmental Hazards and Society reviews and assesses existing knowledge and explores future research priorities in this growing field It showcases the work of international experts including established researchers future stars in the field and practitioners Organised into four parts all chapters have an international focus and many include case studies from around the world Part I explains geophysical and hydro meteorological climatological hazards their impacts and mitigation Part II explores vulnerability resilience and equity Part III explores preparedness responses during environmental hazard events impacts and the recovery process Part IV explores policy and practice including governments support provided during and after environmental hazard events and provision of information This Handbook will serve as an important resource for students academics practitioners and policymakers working in the fields of environmental hazards and disaster risk reduction      **Disaster Relief in the Asia Pacific** Minako Sakai, Edwin Jurriëns, Jian Zhang, Alec Thornton, 2014-01-03 A UN report recently found that the Asia Pacific is the world s most disaster prone region Indeed considering that the region accounts for more than half of the total number of disasters in the world building capacity and resilience to mitigate the devastating impact of disasters is a pressing task for local actors This book takes a regional multidisciplinary and multi actor approach to improve understandings of how various actors respond to natural and human induced disasters in the Asia Pacific region It examines the ideas and activities of four different categories of agents civil society military and state institutions local cultural knowledge and the media and economic initiatives and these themes are approached from various academic disciplines ranging from anthropology and cultural studies to economics human geography and political science The contributors draw their findings from a variety of countries in the region including China Fiji India Indonesia Japan Myanmar and Samoa and importantly focus on the interconnection between vulnerability and resilience In turn the book highlights how the nature and magnitude of disasters are influenced by social conditions and aims to contribute to policies that prioritize development opportunities to enhance resilience Further it explores the complicated and multifaceted role of agency in building resilience and presents a comparative framework for analysis and key findings from the Asia Pacific region The focus of this book on recent and ongoing disasters makes it a topical and timely contribution to the growing field of disaster management and as such it will appeal to students and scholars of environmental studies development studies and Asian politics      *Disasters* Kathleen Tierney, 2019-05-20 Disasters kill maim and generate increasingly large economic losses But they do not wreak their damage equally across populations and every disaster has social dimensions at its very core This important book sheds light on the social conditions and on the global national and local processes that produce disasters Topics covered include the social roots of disaster vulnerability exposure to natural hazards such as hurricanes and tsunamis as a form of environmental injustice

and emerging threats Written by a leading expert in the field this book provides the necessary frameworks for understanding hazards and disasters exploring the contributions of very different social science fields to disaster research and showing how these ideas have evolved over time Bringing the social aspects of recent devastating disasters to the forefront Tierney discusses the challenges of conducting research in the aftermath of disasters and critiques the concept of disaster resilience which has come to be seen as a key to disaster risk reduction Peppared with case studies research examples and insights from very different disciplines this rich introduction is an invaluable resource to students and scholars interested in the social nature of disasters and their relation to broader social forces

### **When Bad Things Happen to Privileged People**

Dara Z. Strollovitch, 2023-07-06 A deep and thought provoking examination of crisis politics and their implications for power and marginalization in the United States From the climate crisis to the opioid crisis to the Coronavirus crisis the language of crisis is everywhere around us and ubiquitous in contemporary American politics and policymaking But for every problem that political actors describe as a crisis there are myriad other equally serious ones that are not described in this way Why has the term crisis been associated with some problems but not others What has crisis come to mean and what work does it do In When Bad Things Happen to Privileged People Dara Z Strollovitch brings a critical eye to the taken for granted political vernacular of crisis Using systematic analyses to trace the evolution of the use of the term crisis by both political elites and outsiders Strollovitch unpacks the idea of crisis in contemporary politics and demonstrates that crisis is itself an operation of politics She shows that racial justice activists innovated the language of crisis in an effort to transform racism from something understood as natural and intractable and to cast it instead as a policy problem that could be remedied Dominant political actors later seized on the language of crisis to compel the use of state power but often in ways that compounded rather than alleviated inequality and injustice In this eye opening and important book Strollovitch demonstrates that understanding crisis politics is key to understanding the politics of racial gender and class inequalities in the early twenty first century

### **Local sources of resilience**

Bernier, Quinn, Meinzen-Dick, Ruth, 2014-05-04 People have always faced shocks and have devised a variety of institutional responses to cope with recover from and prevent future impacts Central to these shocks and this coping capacity but often underexplored is the role of social capital Social capital includes features of social organization such as networks norms and social trust that facilitate coordination and cooperation for mutual benefit and can serve as an asset for communities enabling them to engage in and benefit from collective action and cooperation While social capital takes many forms of particular interest here are local level organizations and less formal social networks Having long played a role in individual household and community risk smoothing and risk sharing practices social capital has also been identified as a vital component of adaptive capacity as well as a key factor contributing to post disaster recovery Practitioners often assume that the poor who lack other assets can develop acquire and utilize social capital instead however as many studies have illustrated the poor face significant challenges in building and using this resource Moreover social

capital by itself may not be sufficient to encourage proactive adaptive behaviors and changes external interventions may be needed to strengthen indigenous associations and support for resilience However clearly understanding local level social capital is necessary for such interventions to effectively engage with and not erode effective local responses This brief explores how local forms of social capital can contribute to resilience and how policy interventions can build up support and deepen these connections

**Building Resilience in Post-Disaster Communities** Edenilson Brandl,2024-12-30 In the aftermath of disasters communities face an immense challenge rebuilding not just physical infrastructure but the very fabric of society Resilience is at the heart of this process enabling communities to recover and thrive despite the hardships they face This work aims to explore the many facets of resilience from psychological support and social cohesion to effective governance and long term sustainability By understanding how resilience is built in various contexts we hope to provide insight and practical strategies for strengthening communities in the face of future disasters

**Housing Recovery after Disasters** Frances L. Edwards, 2019-08-15 Recent disasters have demonstrated the critical role that re housing victims play in communities long term disaster recovery This book examines the history and theories of rehousing the role of bonding social capital applies systems theory to understanding the stages of recovery then presents case studies of long term housing recovery following Hurricane Katrina and Hurricane Sandy in the United States Hurricane Maria in Dominica the 2010 earthquake in Haiti and a variety of disasters in Turkey Nepal Japan and India Together these chapters address what Dr Louise Comfort has called one of the most persistent and difficult policy problems in the field long term recovery of communities following disaster

*Innovative Community Responses to Disaster* Brent D. Hales, Norman Walzer, James R. Calvin, 2017-10-02 Increasingly community leaders around the world face major natural and economic disasters that require them to find ways to rebuild both physical infrastructure and the local economy Doing this effectively requires an understanding of how various parts of the community are interconnected as well as information as to which revitalization approaches have succeeded in the past Community investment in recovery is essential and in some cases may require local leaders to rethink how it can be financed and arranged This book presents a conceptual framework based on the community capitals and describes approaches that have succeeded in situations where local leaders have coordinated efforts to rebuild and revitalize local conditions Contributions provide examples of successful approaches around the world thus analysing potential strategies for addressing disasters of many different types in various cultural settings In this way the book provides insights into a variety of approaches based on applications of accepted community development theory and concepts This book was originally published as a special issue of Community Development

**Community Disaster Recovery** Desera A. Crow, Elizabeth A. Albright, 2021-10-21 Disasters can serve as focusing events that increase agenda attention related to issues of disaster response recovery and preparedness Increased agenda attention can lead to policy changes and organisational learning The degree and type of learning that occurs within a government organization after a disaster may matter to policy outcomes related to individual household and community level risks and resilience Local governments are the first line of disaster response but also bear the burden of performing long term disaster recovery and planning for future events Crow and Albright present the first framework for understanding if how and to what effect communities and local governments learn after a disaster strikes Drawing from analyses conducted over a five year period following extreme flooding in Colorado USA Community Disaster Recovery Moving from Vulnerability to Resilience presents a framework of community level learning

after disaster and the factors that catalyse policy change towards resilience
