

Your APA paper should include five major sections: the Title Page, Abstract, Main Paper, Paper Format and References And Citations. See the timeline handout for important due dates.

**1. TITLE PAGE**

- Your paper should begin with a title page that follows APA format. The info at: <http://owl.english.purdue.edu/owl/resource/560/01/> is great for APA citation.
- Your title should be interesting and inform the reader of your topic.

**2. ABSTRACT**

- An abstract page should include the page header. On the first line of the abstract page, center the word "Abstract" (no bold, formatting, italics, underlining, or quotation marks).
- Beginning with the next line, write a concise summary of the key points of your research. (Do not indent.) An abstract should summarize your research topic, research questions, participants, methods, results, data analysis, and conclusions.
- Your abstract should be a single paragraph double-spaced. Your abstract should be between 150 and 250 words.

**3. MAIN PAPER (will have four distinct parts):**

**I. INTRODUCTION**

- In general, all papers should begin with an introduction that includes a **thesis statement** (see handout on a good/bad thesis).
- The purpose of the introduction is the same as any research paper: in one to two paragraphs, briefly introduce and state the issue to be examined.
- The introduction always states what you are trying to prove/disprove in the paper.

**II. THESIS STATEMENT**

- The most important part of your introduction is this statement.
- The **thesis statement** is the direction of your paper.
- Your thesis must always be underlined in everything you turn in.

**III. BODY**

- Each body paragraph should include a topic sentence.
- Your topic sentences must always be underlined in everything you turn in.
- I repeat: Underline each topic sentence of each paragraph.
- **Paragraphs have no less than four but no more than six sentences.**
- Topic sentences explain/summarize what will be addressed in the paragraph.
- These topic sentences also act as transitions to create a coherent argument.

*Understanding Research in Clinical and Counseling Psychology* Jay C. Thomas, Michel Hersen, 2003-02-26 Understanding Research in Clinical and Counseling Psychology is a unique text because it is designed and written for the graduate students aspiring to careers in practice rather than in psychological science who are the vast majority in clinical and counseling programs To motivate readers to see the value of knowledge produced by research the book opens with an actual case report that shows how research generated strategies incorporated into treatment allowed a woman who formerly would have been considered so hopelessly incapacitated by obsessive compulsive disorder as to require lifetime institutionalization if not neurosurgery to return to normal family and work life The first set of chapters introduces fundamental concepts of measurement sampling and validity The next set systematically presents the kinds of investigations most relevant to budding practitioners group comparisons correlations single subject designs program evaluations and meta analyses Each of these chapters concludes with a detailed example of a study in which students can see how the techniques described are actually employed The third set addresses enduring concerns how to define and maintain ethical standards how to do effective literature reviews and assess the quality of existing data and how to collect and analyze data It also addresses concerns that have emerged recently how to distinguish and judge effective and efficacious treatments and how to contribute to research efforts as a private practitioner The issues involved in the often confusing effectiveness versus efficacy debate are illuminated with a clinically relevant case example Descriptions of alternatives to conventional significance testing such as clinical significance and reliable change analyses help students consider new ways in which they can impose rigor on their own research and practice activities Two final chapters examine the challenges of studying two special groups children and older adults Throughout the authors all capable researchers who are also experienced practitioners demonstrate the ways in which research is an essential foundation for effective and ethical practice Students and instructors alike will welcome this reader friendly book
