Connect Battery

The Back-UPS ES is shipped with one battery wire disconnected in compliance with Department of Transportation (DOT) regulations. The Back-UPS ES will not operate until the wire is connected to the touch safe battery terminal.

NOTE: Small sparks may occur during battery connection. This is normal.

- 1** Turn the Back-UPS ES over and remove the battery compartment cover screws using a flat blade or philips-head screwdriver.

- 2** Slide the battery compartment cover completely off of the Back-UPS ES.

- 3** Lift the battery out of the compartment and connect the Back wire to the battery terminal.

- 4** Replace the battery, battery compartment cover and cover retaining screws.

2

Connect Equipment

Place the Back-UPS ES to avoid:

- Direct sunlight
- Excessive heat
- Excessive humidity or contact with fluids

Plug the Back-UPS ES power cord directly into a wall outlet, not a surge protector or power strip.

Connect Computer Cable

The supplied cable and software provide automatic file saving and shutdown of the operating system in the case of a sustained power outage.

Connect the cable to the Data Port of the Back-UPS ES. Connect the other end of the cable to the USB port on your computer. The software will automatically find the USB Port of your computer.

Connect FAX/Modem/Phone

Back-UPS ES protects a single line (2-wire) fax, modem or phone from surges when it is connected through the Back-UPS ES as shown.

Battery Back-up plus Surge Protection

These outlets are powered whenever the Back-UPS ES is switched ON. During a power outage or other utility problems (brownouts, over-voltages), these outlets will be powered for a limited time by the Back-UPS ES. Plug your computer, monitor, and one other data-sensitive device (external disk or tape drive) into these outlets.

Surge Protection

These outlets provide full-time protection from surges even if the Back-UPS ES is switched OFF. Plug your printer, fax machine, scanner, or other peripherals that do not need battery power into these outlets.

3

Power On and Install Software

Press the ON/OFF switch to power the unit ON.

A single short beep and the green "Power On" indicator confirms that Back-UPS ES is on and ready to provide protection.

The Back-UPS ES should charge for at least 16 hours to ensure sufficient runtime. The unit is being charged whenever it is connected to utility power, whether the unit is turned ON or OFF.

If the red Building Wiring Fault Indicator (located on the end near the power cord) is lit, your building wiring presents a shock hazard that should be corrected by a qualified

Status Indications
