

MANUAL TANK GAUGING

How does the Leak Detection Method Work?

- ✓ EPA has a booklet, Manual Tank Gauging, that fully explains how to do manual tank gauging correctly.
- ✓ Four measurements of the tank's contents must be taken weekly, two at the beginning and two at the end of at least a 36-hour period.
- ✓ The average of the two consecutive ending measurements are subtracted from the average of the two beginning measurements to indicate the change in product volume.
- ✓ Every week, the calculated change in tank volume is compared to the standards shown in the table on the next slide.
