

# Thru-wall Installation Instructions

## for Amana Compact Room Air Conditioner

### Introduction

Amana Compact Room Air Conditioners can be installed through a wall or in a window. Window installations require an Instant Mount Mounting Kit (model number RAWK1). Window mounting kits can be purchased from Authorized Amana Dealers.

This instruction sheet provides guidelines for installing air conditioner through an outside wall.

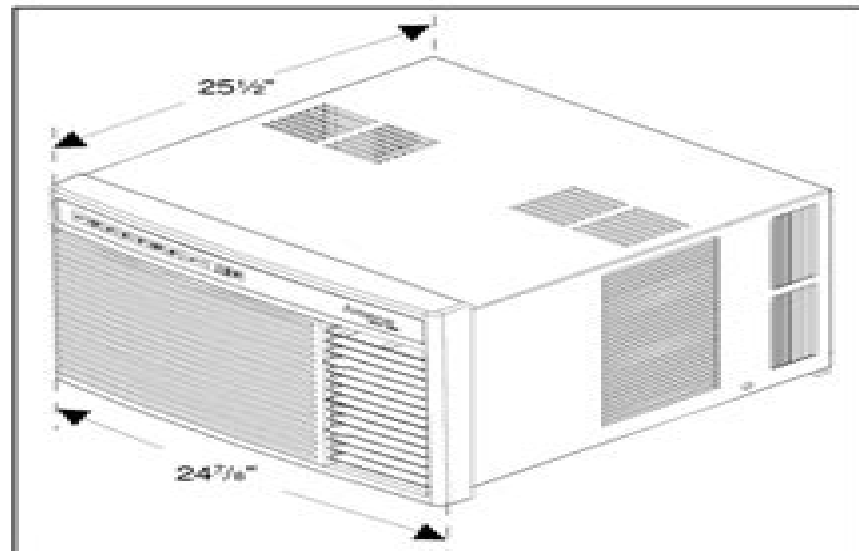

### CAUTION

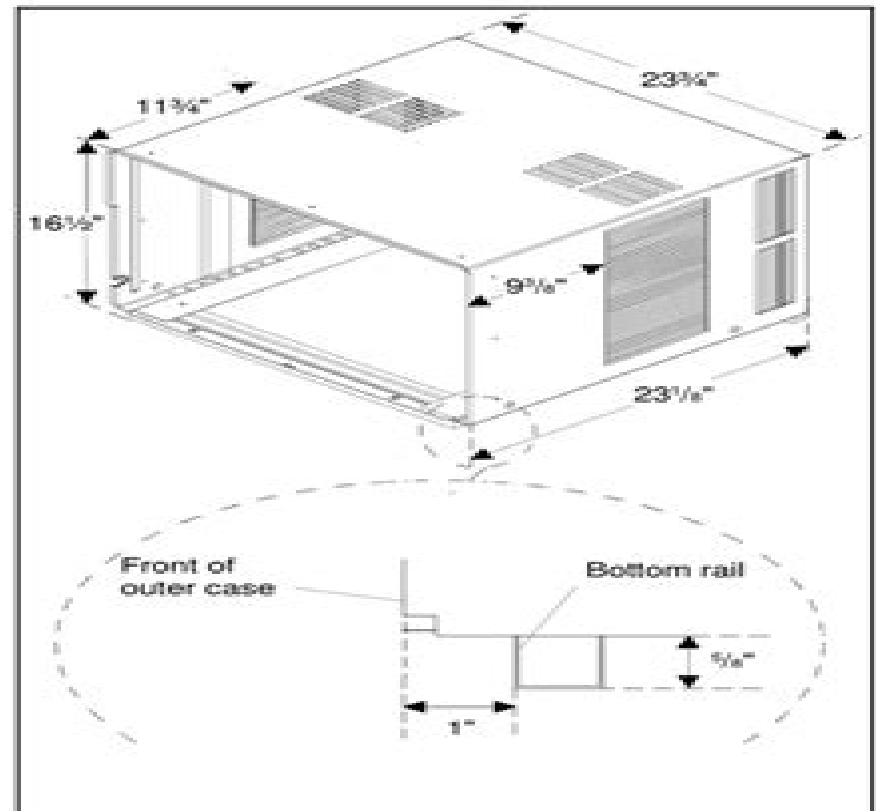

Installing air conditioner through a wall requires extensive carpentry and/or masonry experience. Through wall installations performed by inexperienced or unqualified individuals can result in costly damage to home.

### Air Conditioner Dimensions

The following figures show the outside dimensions of air conditioner with chassis installed, and dimensions of outer case with chassis removed. Dimensions shown are with the top rail removed (bottom rail on case is permanently attached and is included in height dimensions).

Air Conditioner Dimensions  
(with chassis installed)

Outer Case Dimensions  
(chassis removed)

### General Instructions

All Amana Compact Room Air Conditioners feature a slide-out chassis. Chassis must be removed from outer case for installation.

A finished opening 24 1/4-inches wide x 17-inches high is recommended (this provides a finished opening 1/4-inch larger than the outer case on all sides). The lower left inside corner of opening must be within 5 feet of an appropriate electrical outlet (see Use and Care manual for air conditioner electrical requirements.)

When wall thickness exceeds 9 3/8-inches, opening must be modified to allow air to enter side louvers on case (see special instructions on back ). Do not install air conditioner in walls thicker than 11 3/4-inches.
