*Invested with Meaning* Shannon Miller,1998-06-29 In the closing decades of the sixteenth century England attempted its first colonial expansion into the New World through planned settlements in Ireland Newfoundland Virginia and Guiana All of these colonial efforts were unsuccessful Yet these projects were a significant cultural force in early modern England Influenced by recent work in postcolonial theory and cultural studies Shannon Miller s *Invested with Meaning* examines the documentary and material remains of these vanished colonies to explore the multiple influences of the Irish and New World encounters on English culture Miller contends that the projects sponsored by the Raleigh circle were inextricably bound to the economic and social transformations of English systems including the transition from a feudal based economy to an emergent capitalism the redefinition of the patron client relationship and challenges to the categories of gentry and merchant These social and economic transitions shaped the goals of the colonization projects and dictated the ways in which the writers and artists of these enterprises could frame the New World and its people influenced by the changes in England their construction of the New World both reflected and helped to constitute a sense of English national identity

**Copyright and Trade Mark Infringement** Zoi Krokida,2022-06-16 This book critically evaluates the EU regulatory framework for the liability of host Internet Service Providers ISPs for copyright and trade mark infringements and provides a cluster of novel recommendations for its improvement The book recommends the imposition of a duty of care to host ISPs to curb the dissemination of unauthorised works and counterfeit goods the ascription of a transparency obligation to host ISPs towards their users and the establishment of a supervisory authority for host ISPs Host ISPs have facilitated the

dissemination of content amongst users and the purchase of goods online enabling copyright holders and brand owners to attract a greater audience for their works and goods However their services have attracted a high number of copyright and trade mark violations too Neither Article 14 of the e Commerce Directive nor Article 17 of the Copyright in the Digital Single Market Directive provide a solid response to the issue of host ISPs liability This book is a valuable resource for researchers in IT and IP law and offers a new perspective for resolving online IP disputes *Standard Daily Trade Service* ,1918
