This unique and valuable publication charts the history and development of the ambulance service in England over the last hundred years or so. The role of this key emergency service has always been important and arguably never more so than today. The contributing authors have not only provided the reader with great insights into where the service has come from and the leadership challenges it has and continues to face, it also gives examples of how the future could look as our journey of transformation continues. Peter Bradley CBE MBA and author of *Taking Healthcare to the Patient* 2005 Chief Executive Officer St John National Headquarters New Zealand. With a year-on-year increase in demand for emergency ambulances and over 9 million calls annually, the UK Ambulance Service must change from its emergency care and transport focus model. With the increase in professionalism of paramedics and an uplift in assessment and clinical skills, the modern paramedic is increasingly able to treat at home, direct patients with alternative care pathways and avoid transportation to overburdened Emergency Departments. Whilst there is some historical and cultural resistance to change, there is a need for further development in clinical skills and a new perspective for the future Ambulance Service. This book brings together practitioners, managers, academics and provides a broad understanding of the major management issues in the UK Ambulance Service. It includes the history of the Ambulance Service, quality and risk management issues, commissioning, leadership, intra-operability and the shape of the future ambulance service. The content will be of interest to students, practitioners and academics. Sir Keith
