# NOVEL FORMAT

## About This Template

By default, when compiled (File > Compile...), this project will generate a document in the standard manuscript format for novels. Settings are also provided to make it easy to compile to a paperback-style PDF for self-publishing or an ePUB or Kindle ebook.

## How To Use This Template

- Inside the "Manuscript" folder, create a new folder for each part of your novel as direct subdocuments of the Manuscript folder. Two folders have already been created at this level for you, with the placeholder title "Part". You should rename these with the titles of the parts of your novel.
  - Note: The "Manuscript" folder is what we refer to in the documentation as the "Draft folder". It's just been renamed "Manuscript" in this template.
- Create a new folder for each chapter inside the relevant "Part" folder and title each folder with the name of the chapter. If you don't intend to use chapter names, just use something descriptive that tells you what the chapter is about. (You do not need to—and indeed shouldn't—title the folders "Chapter One" and so on, because chapter numbering will be taken care of automatically during the Compile process.) The first chapter folders have been created for you with the placeholder title "Chapter".
- Create a new text document for each scene inside the chapter folders. (Upon export, scenes will be separated with the "#" character for standard manuscript format and with a blank line for other formats.)

*Writing Program Architecture* Bryna Siegel Finer, Jamie White-Farnham, 2017-11-01 Writing Program Architecture offers an unprecedented abundance of information concerning the significant material logistical and rhetorical features of writing programs. Presenting the realities of thirty diverse and award winning programs contributors to the volume describe reporting lines, funding sources, jurisdictions, curricula and other critical programmatic matters and provide insight into their program histories, politics and philosophies. Each chapter opens with a program snapshot that includes summary demographic and historical information and then addresses the profile of the WPA program conception, population served, funding, assessment, technology, curriculum and more. The architecture of the book itself makes comparison across programs and contexts easy, not only among the programs described in each chapter but also between the program in any given chapter and the reader's own program. An online web companion to the book includes access to the primary documents that have been of major importance to the development or sustainability of the program described in a Primary Document section of each chapter. The metaphor of architecture allows us to imagine the constituent parts of a writing program as its foundation beams, posts, scaffolding, the institutional structures that alongside its people anchor a program to the ground and keep it standing. The most extensive resource on program structure available to the field, Writing Program Architecture illuminates structural choices made by leaders of exemplary programs around the United States and provides an authoritative source of standard practice that a WPA might use to articulate programmatic choices to higher administration. Speck,1999-07-30 Collaborative writing has attracted much attention in the last 25 years though it eludes clear definition In its simplest sense it is writing done by more than one person

But in a broader sense even a work by one author involves collaboration. The author typically builds on the work of others and revises the writing in response to feedback. This feedback can come from a student's peers or teacher in a classroom setting, it can come from experts and editors who assess a scholar's writing, or it can come from colleagues and clients in the world of business. This bibliography is a guide to research on collaborative writing published from the early 1970s to 1997. Included are nearly 1000 annotated entries for books, articles, reports, bibliographies, and other materials. These entries are clustered in two broad parts, each of which contains numerous topical sections. The first part of the book is devoted to collaborative writing in academic settings and covers such topics as classroom issues, peer review, and tutoring, the role of computers and technology, particular types of classes, and ethical and gender concerns. The second looks at collaborative writing in nonacademic settings. Included are works on corporate acculturation, group dynamics, policies and procedures, industry, university collaboration, and technical reports. Entries are arranged alphabetically in each section and detailed author and subject indexes provide easy access to the material.
