Alzheimer's Angels Dorothy Womack, 2002-08-29 Alzheimer's Angels is a compilation of poetry honoring the caregivers and victims of this cruel disease. These poems reflect the true stories and spirit not only my own mother but countless others who have braved the same journey. It is my sincere hope that something in these words will speak comfort and hope to your own hurting heart.

Alzheimer's Disease: What If There Was a Cure (3rd Edition) Mary T. Newport, 2023-09-19 Third Edition Fully Updated and Expanded. There is hope, there is relief, there is another way to treat Alzheimer's disease. More than 6.5 million people in the United States suffer from Alzheimer's and other neurodegenerative diseases. Dr. Mary T. Newport's husband Steve was one of them. In Alzheimer's Disease: What If There Was a Cure, Dr. Newport shares Steve's story, how he fell into the abyss that is Alzheimer's disease and was able to climb back out to enjoy a nearly four-year reprieve from the disease thanks to a dietary intervention with coconut oil and MCT medium chain triglyceride oil. Since Steve's remarkable turnaround from early-onset Alzheimer's in 2008, Dr. Newport has communicated with hundreds of people and their caregivers dealing with neurodegenerative diseases. In addition to detailing the most recent research on the links between Alzheimer's and many common medications, Dr. Newport illustrates how infection, inflammation, and genetic makeup may affect an individual's response to fatty acid therapy. She also covers the recent advances in imaging technologies which have made it possible to detect subtle changes in the brain a decade or more before a person develops obvious symptoms, giving at-risk individuals the opportunity to take preventive measures. While the cause of Alzheimer's disease is not known, Dr. Newport's research offers a message of hope and shows how adopting certain lifestyle changes could prevent delay or otherwise alter the course of the disease.

Legacy and Future Impact of Gaming Simulation Pioneers Willy Christian Kriz, Toshiko Kikkawa, Marieke de Wijse-Van Heeswijk, Heide Lukosch, 2025-04-10. This book is a tribute to two pioneers in the field of gaming simulation: Richard de la Barre Duke and Cathy Stein Greenblat. Duke was a professor of urban planning at the University of Michigan who introduced gaming simulation into urban planning and policy making in the early 1970s. With his 1974 book *Gaming: The Future's Language*, he proposed simulation games as a multilogue language for bringing different disciplines and stakeholders' perspectives together. He was co-founder of the International Simulation and Gaming Association (ISAGA). Cathy Stein Greenblat was a professor of sociology at Rutgers University, using gaming simulation in education and health care beginning in the mid-1970s. She was editor in chief of the international journal *Simulation Gaming* for many years. Duke and Greenblat worked together and authored several influential books, and both were honorary members of ISAGA until they passed away in 2022. The present book focuses on the past and actual scientific and practical impact of their work for design and development, facilitation and debriefing, evaluation and research of simulation games. The book contains discussions and case examples of how their key concepts are still used and can be used in the future to have a

social impact through gaming simulation Furthermore the book shows how their work and guiding simulation game design principles continue to inspire ongoing and future research in the context of dealing with complexity and to support social and environmental transition through gaming simulation Included are interviews with the two pioneers and contributions of other outstanding experts about their work
