Introduction: Tigers have always been fascinating animals to watch. Perhaps it is the way that they quietly stalk their prey as they gracefully move through the tall grass. Or maybe it is the long leaps they take when they pounce on their victim. One of their most recognizable features is their bright orange-colored fur and black stripes. But did you know that there is a reason for these black stripes? Do you know why the tigers have these black stripes? You may know that the tiger is a descendant of the saber-tooth tiger. But did you know that the tigers weren't always the size that you see today? Or do you know how many types of tigers exist today? Were you aware that a new species of tiger was identified and named as recently as 2004? Are you aware that all of the tigers are on the endangered species list and run a risk of becoming extinct? There are laws in place worldwide to save and protect these big cats. Some tigers live in very remote regions, and there is so much we still can learn about these amazing creatures. Welcome to the world of tiger as we explore the many regions they live in and
