Essay from the year 2018 in the subject Communications Mass Media grade 1 0 University of Deusto language English abstract In the Netherlands fourteen million people out of a population of sixteen million have access to a television In 2017 the number of people who made use of this medium sank about 3% in comparison to 2016 This means that last year the Dutch watched TV around 178 minutes per day Television has been and still is an important medium for advertising information and entertainment But what is its role now what was it 30 years ago and what will the future hold The attention lays on how the consumption of TV shows and channels in the Netherlands is developing and what the current key points within this medium are What are the risks chances and opportunities and what are the alternatives that the television as a medium is facing Thus the past present and future of TV usage will be the guideline of this paper **Internet Health Report 2019** Mozilla Foundation,2019 This annual report is a call to action to recognize the things that are having an impact on the internet today and to embrace the notion that we as humans can change how we make money govern societies and interact with one another online We invite you to participate in setting an agenda for how we can work together to create an internet that truly puts people first This book is neither a country level index nor a doomsday clock Our intention is to show that while the worldwide consequences of getting things wrong with the internet could be huge for peace and security for political and individual freedoms for human equality the problems are never so great that nothing can be done More people than you imagine are working to make the internet healthier by applying their skills creativity and personal bravery to business technology activism policy and regulation education and community development
