Strategic Alliance Management Brian Tjemkes, Pepijn Vos, Koen Burgers, 2017-09-19

Strategic alliances partnerships between separate organizations to share resources collaboratively toward mutually beneficial goals are an important management instrument but one that is difficult for firms to manage. Among many desirable outcomes alliances can reduce costs, provide access to new technology and improve research and development endeavours though collaborative arrangements come with risks, peril and adversities. This renewed and re-worked text connects theory to practice to help understand this important business practice. *Strategic Alliance Management* presents an academically grounded alliance development framework detailing eight stages of alliance development with consideration for specific management challenges. For each stage readers are presented with state of the art theoretical insights, evidence based managerial guidelines and a business case illustration. Additional chapters detail on contemporary alliance management challenges including co-operation and business eco systems. Other chapters highlight the role of alliance professionals, alliance capabilities and paradoxical challenges in alliance relationships. This second edition retains a blend of academic knowledge and practical examples while updating case examples and adding five new chapters on emerging alliance topics. This book remains vital reading for business students and professionals interested in strategic management.

Transformative Strategies Brian Tjemkes, Oli Mihalache, 2021-04-29. *Transformative Strategies* is based around the idea that strategic thinking is critical for organizational success in today's environment. The financial crisis, continuing economic uncertainty, digitalization, environmental issues and social issues involved in globalization present strategic problems for enterprises. Unlike other textbooks that take a standard solutions based approach, *Transformative Strategies* provides readers with a way to develop strategies that fit their own complex situations and shows how models may be applied in different ways to different problems. Each of the four key elements affecting the business environment—globalization, disruption, collaboration and responsibility—are addressed as a set of tensions in eight areas: global competition, business model innovation, digital strategizing, business eco systems, corporate social responsibility, top management teams, and trans-cultural leadership in a globalized world. This tension based pedagogy enables readers to shift from dichotomized thinking such as exploring or exploiting to transformative thinking such as exploring and exploiting. Exploring through exploiting and readers are challenged to solve real problems that companies face, encouraging them to acknowledge the broader context in which organizations operate and to analyze the problem from multiple perspectives. Each chapter is structured to aid engagement and discussion, including a discussion of the tension tied to the chapter's topic, learning objectives, theoretical frameworks, real life case studies, exercises and reflective questions. A highly practical book that encourages readers to develop solutions that fit their own complex problems, it will be particularly suitable for those studying strategic management as part of an MBA, MA or MSc in Management, as well as those in executive education. It will also appeal to all those interested in learning how to lead and transform organizations towards impact, purpose and relevance. Online resources include discussions of the case studies, supplementary problems for class discussion and an instructors manual outlining the pedagogical approach.
