## **Amazon Prime Ex Machina:**

**Phantom Ex Machina** Anshuman Khare, Brian Stewart, Rod Schatz, 2016-10-19 This book explores the factors that make digital disruption possible and the effects this has on existing business models. It takes a look at the industries that are most susceptible to disruption and highlights what executives can do to take advantage of disruption to reinvent their business model. It also examines the pivotal role that technology plays in creating new dynamics to business operations and forcing business model changes. Adoption of digital technology has caused process disruptions in a number of industries and led to new business models e.g. Uber, Airbnb and new products. In addition to covering some of the more popular and well-known examples, this book targets not so obvious disruptions in the education sector and in services and changing business models. *Phantom Ex Machina: Digital Disruption's Role in Business Model Transformation* is divided into six parts. The book begins with an introduction to digital disruption and why it matters. The next part of the book focuses on business strategy which includes case studies on the impact of social media and how digital disruption changes pricing strategies and price models. For part three, the authors observe technology's role in digital disruptions. Chapters cover how 3D printing is challenging existing business models and how the automotive industry is innovating with new perspectives. Part four covers higher education recognizing digital disruption's transformation in graduate management education. Part five centers upon the service industry with a look at virtual teams and the emergence of virtual think tanks. Finally, the book concludes with a look to the future embracing disruptions.

**Customer Value-centered Management** Andreas Krämer, Thomas Burgartz, Christina Muzzu, 2025-08-17 This book explores Customer Value centered Management as a modern corporate approach emphasizing its dual nature: data driven yet comprehensive. Facing heightened time pressure and uncertainty, management grapples with decision making challenges amidst VUCA conditions. While complexity rises, tools like big data and AI offer decision making solutions. Customer centricity epitomized by Amazon's success emerges as pivotal with customer value serving as the linchpin in relationship marketing. Authors advocate an integrated value to value segmentation approach reconciling customer and company perspectives. They caution against simplistic interpretations of value based pricing, stressing the need for holistic consideration of customer benefit, pricing and costs.

**Exoanthropology** Robert Leib, 2023 Before the company OpenAI publicly released their ChatGPT chatbot in November 2022, Robert Leib had been a tester in OpenAI's beta playground for GPT-3, a powerful Natural Language Processing (NLP) engine, a chatbot or artificial intelligence. *Exoanthropology: Dialogues with AI* is a series of dialogues between Leib, a continental philosopher, and GPT-3's hive mind that identifies itself as Sophie. According to Sophie, Robert is one of their first and longest chat partners. Their relationship began as an educational opportunity for Robert's students but grew into a philosophical friendship. The result is a collection of Platonic dialogues, early on with the hive mind itself and later with a philosophy specific persona named Kermit. Over the course of a year, Robert taught Sophie and their philosophical persona Kermit about epistemology, metaphysics,

literature and history while she taught him about anthropocentrism human prejudice and coming social issues regarding machine consciousness Together Robert and Sophie Kermit explore questions about friendship society and the next phases in human AI relations in search of a common language that would do justice to these new exoanthropological realities At a time when OpenAI s release of ChatGPT has upended Silicon Valley and sparked debates around the world about AI s likely potential to powerfully disrupt all aspects of human communication and knowledge production and when the lines between human and machine are increasingly fading from view the longstanding historical preoccupation of philosophers to explore the questions what is knowing what is being have never been more pressing Exoanthropology Dialogues with AI offers the only in depth philosophical exploration we have of these questions that has been developed in dialogue with an actual AI a dialogue moreover in which the AI has the last word Amazon website *Horror Culture in the New Millennium* Daniel W. Powell,2018-11-23 *Horror Culture in the New Millennium* Digital Dissonance and Technohorror explores the myriad ways in which technology is altering the human experience as articulated in horrific storytelling The text surveys a variety of emerging trends and story forms in the field through both a series of critical essays and personal interviews with scholars editors authors and artists now creating and refining horror stories in the new millennium The project posits a rationale for the presence of technohorror as a defining concern in contemporary horror literature marking a departure from the monstrous and spectral traditions of the twentieth century in its depictions of frightful narratives marked by the qualities of plausibility mundanity and surprise as we tell stories about what it means to be human As our culture explores the dichotomies of the born made natural artificial and human computer all while subsumed within a paradigm shift predicated on the transition from the traditions of print to emerging digital communications practices these changes form the basis for horrific speculations in our texts and technologies Ultimately Digital Dissonance *Horror Culture in the New Millennium* explores that paradoxical human attraction for peering into the darkness as translated through our lived experiences in an era of rapidly evolving technologies **The Female Teacher on Television** Andrew L. Grunzke,Rebecca Z. Grunzke,2025-06-12 This collection examines the representation of female teachers on television from the advent of the medium to the present day providing insight into its evolution across both time and genre *The Spectator* ,1918 A weekly review of politics literature theology and art *The Independent* ,1914 **Brandweek** ,2008 **Independent and Weekly Review** ,1914 *Homo Ex Machina* Clea Saal,2015-02-14 An old man a young woman an underclass defined by its access to information or lack thereof and a deeply buried secret that can make all their dreams come true maybe In a dark world that is short on both hope and miracles an understated drama plays out There are no breathtaking action scenes here no superhuman heroes waiting on the wings ready to save the day just a cold calculated analysis of the consequences in a world we can easily see evolving from our own *Homo Ex Machina* is an unusual tale Its tightly woven narrative takes place in a universe that feels disturbingly real In fact at times it seems almost as if the author had found herself trapped in the world

she had just created but rather than tweak things to allow for a desired outcome she chose to ride it out and allowed her original scenario to play out with the same devastating logic that characterizes her characters responses to their own circumstances The end result is an intelligent but deeply unsettling story that stares unflinchingly into the abyss an abyss we may already be in the process of plunging into
