**After the Pandemic** Randy Whitaker,2022-10-10 Many things define a job seeker experience education first impressions connections passion and the value you might bring to the company you wish to work for For decades the perceived ideal candidate would have all of the above most of the above however a good candidate would have a four year college degree To a great extent an employer still would like someone with a four year college degree However I believe this is changing The need for those who work with their hands and those who are willing to work their way up through the various levels of an organization is becoming more and more desired by companies The time it will take you to earn your degree you could be making a nice living and will have accrued zero debt in the process Plus after working in an industry of your choice something you do have an interest in even a passion for you may be on equal footing with a newly hired college grad based on the four years you have been working in your industry of choice as you continue to work your way up through the company You will find the more value you bring to a company the more they will look to you to assume great responsibility Typically the more responsibility the greater the paycheck What makes this book timely is the fact as COVID 19 winds down we are seeing many labor shortages in many areas and industries Now is the absolute best time to go to an industry experiencing a labor shortage or enter one of the numerous industries researched in this book and get yourself the job you always wanted without the cost and time involved with getting a four year college education I have nothing against getting a degree and there are still many fields where they will always be mandatory however the trades service industries government railroads law enforcement plus many others will welcome you with open arms without the need for a four year degree I hope this book helps

**It Revolution** Michael Higgs,2019-10-18 Technology is so ubiquitous and such an integral part of our lives and our culture that we take it for granted Indeed technological advancement is bringing

wonderful enhancements to our lives in the form of productivity ease comfort convenience and fun But technology is always changing So where will we be in ten years Will technology result in a utopian society or will the picture be much bleaker and darker Here is the ugly truth this rapid exponential growth of IT will soon bring massive even cataclysmic social disruption and upheaval In many fields of employment IT is taking humans out of the equation and making us obsolete Entire job classifications and industries will soon disappear Will yours be one of them To make matters worse many fall back jobs that people currently rely on to help them get through the tough times caused by layoffs will soon be gone Think about this impending future development What will millions of people do when they cannot find a job of any kind at any amount of pay Where will they turn How will they respond And what will be the effect on society overall The vast majority of people are unaware of what will soon happen According to IT Revolution we as a society are like the passengers on the Titanic coasting along comfortably and complacently blissfully ignorant of the disaster that looms before us We are taking a head in the sand approach to the future believing that disasters will happen to somebody else or that the government will take care of me But disaster will soon happen to many of us maybe even all of us and the government won't be able to help us So we must prepare to be able to respond to the future and we must start preparing now This is a book that will trouble you It will antagonize you It will scare you But it will also give you hope As you read IT Revolution you will discover How and why the 15 per hour minimum wage movement will backfire on those demanding that it be implemented The serious downside of modern day white collar life Why technology is rapidly morphing from our Servant to our Master That technology is not just affecting the white collar world many blue collar and service jobs are at risk of disappearing How Supervisoritis is harming quality of life for millions of people in the industrialized world and costing western economies billions of dollars annually How higher education is leaving many graduates woefully unprepared for the real world How a major failure of the education system is leading to the removal of millions of people from the workforce and the rapid takeover of industries by IT A question company leaders need to answer in order to start moving down the road to progress and financial success What specific steps you can start taking now to shield yourself and your family from the coming disaster Tough times lie ahead for all of us But it's not too late for you to take action It's not too late to prepare But we as individuals family members leaders of companies and society as a whole must act now Why not let this riveting fascinating book serve as a practical roadmap
