## **Algorithms And Architectures For Real Time Control 1991:**

*Algorithms and Architectures for Real-Time Control 1991* P.J. Fleming,D.I. Jones,2014-07-22 Computer scientists have long appreciated that the relationship between algorithms and architecture is crucial Broadly speaking the more specialized the architecture is to a particular algorithm then the more efficient will be the computation The penalty is that the architecture will become useless for computing anything other than that algorithm This message holds for the algorithms used in real time automatic control as much as any other field These Proceedings will provide researchers in this field with a useful up to date reference source of recent developments
