Standard American English: Socially Distinguishing? Daniela Daus, 2006-04-10 Intermediate Examination Paper from the year 2004 in the subject American Studies Linguistics grade 2 5 Johannes Gutenberg University Mainz course PS Regional and Social Varieties of American English language English abstract Language variation could also be called the most basic and fundamental of human socialisation tools You need language to express yourself to learn things to communicate and to get educated Without language an independent life is hardly to live As long as people speak there always have been dialects and individual ways of speaking in one language British English for example during the twelfth and thirteenth century was spoken in four varieties besides French and Latin Throughout the fourteenth and fifteenth century the more unified Great Britain needed some kind of Standard to cope with official tasks and affairs So at some point it seems necessary to compromise on one way of speaking for official matters This paper will focus on Standard American English as a sociolinguistic tool A brief history of American English will be given and definitions of Standard American English will be discussed The central question of this paper will be Why there is a need for the so called Standard Whom does it serve Is it an ideology of the upper classes to distinguish them also linguistically from the lower classes Or is the function of Standard American English solely to enable the American people to communicate on an even level despite the various dialects Further the example of New York City speech will be given to show that Standard seems to be necessary for upward mobility
