An Integrative Approach to Human Geography Jose Lopez-Jimenez, Wayne Allen, Cynthia Miller, 2014-12-31 *An Integrative Approach to Human Geography* Jose Javier Lopez, Wayne E. Allen, Cynthia Ann Miller, 2011-06-06

An Integrative Approach to Human Geography is a compendium of geographic topics that attempts to give readers an understanding of common themes in social science literature that concerns geographers. Combining essays selected from geographers and non-geographers, this anthology illustrates the presence of geography in texts and manuscripts that people often label as non-geographic. This approach helps social science students identify geography where it is often believed to be absent and it encourages non-geographers to realize that they can contribute their talents to the richness of geographic knowledge. Instead of following a normative approach, *An Integrative Approach to Human Geography* encourages those outside the discipline to see the geographic within their own fields of expertise. This text highlights a coalescence in the social sciences under the banner of geographic literacy.

Jose Javier Lopez is Professor of Geography at Minnesota State University in Mankato. He was born in San Juan, Puerto Rico and received a doctorate degree in Geography from Indiana State University. Over the years, he has taught a wide variety of geography courses including Spatial Statistics, Spatial Analysis, Cultural and Social Geography, Latin American Studies, and Economic Development.

Cynthia A. Miller is an Associate Professor of Geography at Minnesota State University, Mankato. She earned her B.A. and M.A. degrees in Geography at the University of Georgia and her Ph.D. in Geography at Syracuse University. Her professional specialties include cultural and historical geography.

Wayne E. Allen received his Ph.D. in cultural anthropology in 1998 from the University of California at Santa Barbara. In 1993-94, he was a Fulbright Scholar to Canada and a UCSB IHC Humanities Fellow. He was the recipient of Minnesota State University, Mankato's Clarence E. Harris Humanitarian Award in 2005-2006 for his support of cultural diversity on campus and in the surrounding community and region. His research focuses on Native North Americans, experimental archaeology, resource colonialism, commons dilemmas, and resource sustainability, community resource management, traditional indigenous cultural and natural resource conservation practices, environmental racism, and environmental justice.

Universities across North America and beyond are experiencing growing demand for off-campus experiential learning. Exploring the foundations of what it means to learn out there, *Out There Learning* is an informed critical investigation of the pedagogical philosophies and practices involved in short-term off-campus programs or field courses. Bringing together contributors' individual research and experience teaching or administering off-campus study programs, *Out There Learning* examines and challenges common assumptions about pedagogy, place, and personal transformation while also providing experience-based insights and advice for getting the most out of faculty-led field courses. Divided into three sections that investigate aspects of pedagogy, ethics of place, and course and program assessment, this collection offers voices from the field highlighting the experiences of faculty.

members students teaching assistants and community members engaged in every aspect of an off campus study programs Several chapters examine study programs in the traditional territories of Indigenous communities and in the Global South Containing an appendix highlighting some examples of off campus study programs Out There Learning offers new pathways for faculty staff and college and university administrators interested in enriching the experience of non traditional avenues of study

The Asian Megacity Region Debnath Mookherjee, 2020-04-11 This book argues that close and disciplined scrutiny of the Asian megacity regions is of critical importance to understanding Asian urbanization However any approach to studying these regions must adopt a multi dimensional and trans urban perspective otherwise we Without such an approach we cannot truly make meaningful decisions about growth management and sustainable development for such regions Amidst the sweeping demographic and structural shifts produced by global urbanization Asian urbanization has a fascinating and prominent role Asian urbanization is heterogeneous and more accurately constitutes phenomena than a phenomenon However despite this diversity there are certain common features that we can identify One of them is the Asian megacity region the administrative and or delineated territory of mixed urban rural landscape surrounding a giant metropolis The purpose of this book is to Understand the main features of 21st century urbanization Note the limitations of current approaches e g disparate scales city centric views inadequate data sets Articulate a pragmatically framed three pronged approach scale based trans urban multi dimensional Demonstrate the application of such an approach with a case study of one of the most important megacity regions in South Asia the Delhi National Capital Region underscoring the methodological requirements of such an approach Discuss the next steps for the field as a whole questions to be raised and directions to be explored for further study This timely conceptual and

empirical book will appeal to students of urbanization architects involved in urban policy and planning and researchers alike
