An Introduction to Homotopy Theory Peter John Hilton, 1972 *An Introduction to Homotopy Theory* Peter John Hilton, 1953 "An" *Introduction to Homotopy Theory* J. Hilton, 1953 An Introduction to Homotopy Theory Peter John Hilton (Mathématicien), 1964 *An Introduction to Homotopy Theory* Peter Hilton, 1953 Topological Methods in Group Theory Ross Geoghegan, 2007-12-17 This book is about the interplay between algebraic topology and the theory of infinite discrete groups It is a hugely important contribution to the field of topological and geometric group theory and is bound to become a standard reference in the field To keep the length reasonable and the focus clear the author assumes the reader knows or can easily learn the necessary algebra but wants to see the topology done in detail The central subject of the book is the theory of ends Here the author adopts a new algebraic approach which is geometric in spirit Cohomology Operations and Applications in Homotopy Theory Robert E. Mosher, 1979 *Cambridge Tracts in Mathematics and Mathematical Physics*, 1964 **A Comprehensive Textbook of Classical Mathematics** H.B. Griffiths, P.J. Hilton, 2013-11-11 arithmetic of the integers linear algebra an introduction to group theory the theory of polynomial functions and polynomial equations and some Boolean algebra It could be supplemented of course by material from other chapters Again Course 5 Calculus discusses the differential and integral calculus more or less from the beginnings of these theories and proceeds through functions of several real variables functions of a complex variable and topics of real analysis such as the implicit function theorem We would however like to make a further point with regard to the appropriateness of our text in course work We emphasized in the Introduction to the original edition that in the main we had in mind the reader who had already met the topics once and wished to review them in the light of his or her increased knowledge and mathematical maturity We therefore believe that our book could form a suitable basis for American graduate courses in the mathematical sciences especially those prerequisites for a Master's degree Papers in Honour of Bernhard Banaschewski Guillaume Brümmer, Christopher Gilmour, 2013-11-11 Proceedings of the BB Fest 96 a conference held at the University of Cape Town 15-20 July 1996 on Category Theory and its Applications to Topology Order and Algebra **Homology Theory**, 1973-06-06 Homology Theory **Intersection Spaces, Spatial Homology Truncation, and String Theory** Markus Banagl, 2010-07-08 The present monograph introduces a method that assigns to certain classes of stratified spaces cell complexes called intersection spaces whose ordinary rational homology satisfies generalized Poincaré duality *Fibre Bundles* Dale Husemoller, 2013-03-09 Fibre bundles play an important role in just about every aspect of modern geometry and topology Basic properties homotopy classification and characteristic classes of fibre bundles have become an essential part of graduate mathematical education for students in geometry and mathematical physics In this third edition two new chapters on the gauge group of a bundle and on the differential forms representing characteristic classes of complex vector bundles on manifolds have been added These chapters result from the important role of the gauge group in mathematical
