Rus Hoelzel,2009-04-01 This book provides a general introduction to the biology of marine mammals and an overview of the adaptations that have permitted mammals to succeed in the marine environment Each chapter written by experts in their field will provide an up to date review and present the major discoveries and innovations in the field Important technical advances such as satellite telemetry and time depth recorders will be described in boxes Marine Mammals Peter G.H. Evans,Juan Antonio Raga,2001-12-31 The field of marine mammal science has made enormous strides in the last ten years as well as attracting a large amount of interest due no doubt to the public appeal of whales dolphins and seals which are never out of media attention The purpose of this book is to review key topics through chapters on the major disciplines from invited authorities around the world Subjects covered include evolution and genetics life histories ecology physiology behaviour medicine diseases parasitology survey methodology and all the main conservation issues pollution fisheries interactions and sound disturbance The book has an ecological and conservation emphasis since these are subject areas calling for the most attention in the modern world but other areas such as evolution

physiology and medicine are also given in depth treatment The book is written at the level of the undergraduate or above although its style should appeal to anyone with a serious interest in marine mammal science     **Marine Mammals of the World** Marc A. Webber,Thomas Allen Jefferson,Robert L. Pitman,2015-07-28 This new edition of Marine Mammals of the World describes and illustrates newly discovered and rarely photographed species making it the most comprehensive and up to date identification guide available This edition continues to meet the research focused needs of marine biologists and conservation biologists by providing a tremendous influx of new photos taking advantage of advances in digital and auto focusing photography and the emergence of marine mammal studies and whalewatching around the world The book encompasses cetacean pinniped and sirenian species as well as extinct species and describes basic biology and taxonomic groupings of marine mammals Contains superb photographs of every species of marine mammal for accurate identification Authors possess nearly 80 years of collective experience with almost all of the species and distinctive geographic forms described in the guide Provides the most detailed and anatomically accurate illustrations currently available including more than 750 new illustrations Special emphasis is placed on the identification of species in problem groups such as the beaked whales long beaked oceanic dolphins and southern fur seals Includes a detailed list of sources for more information Contains updated taxonomy including four new species     *Marine Mammal Ecology and Conservation* Ian L. Boyd,W. Don Bowen,Sara J. Iverson,2010-08-12 Marine mammals command a high level of public attention reflected in specific legislation for their protection and management in many countries They also present particular challenges to ecologists and conservation biologists They are mostly difficult to observe they occupy an environment that is vast in its three dimensional extent there are often perceived conflicts between marine mammals and people and furthermore several species are now close to extinction Marine mammals have some intriguing features in their biology the ability to dive to crushing depths to perform breath hold dives that defy our current understanding of mammalian physiology and many have an ability to hunt down prey using sophisticated sonar that we are only just beginning to understand Many species also have complex social structures We still have much to learn about these extraordinary animals so a comprehensive and authoritative overview of current methodology is now timely The intention of this book is both to summarize the state of the art and to encourage innovation and further progress in this research field     **Encyclopedia of Marine Mammals** William F.
