**Handbook of Smart Built Environment** Weisheng Lu, Chimay J. Anumba, 2025-03-20 The primary aim of this edited volume is to document the current theories best practices and technological advancements in the move towards a Smart Built Environment SBE The needs to accelerate towards the SBE are numerous and include Increasing complexities and the need for interconnectivity within the built environment e.g mega infrastructure projects Data driven decision making resulting in

higher demand from clients e.g. smart design, construction, operation and end of life (EOL). High requirements from stakeholders e.g. system efficiency, environmental performance, green procurement, fast-paced technological advancement and integration, natural disaster resilience of the built environment e.g. prediction, smart control of building component. Sustainability issues around the built environment. In this book, the interrelationships among the various lifecycle stages: design, construction, operation and EOL, the collective benefit of synergy at building level, multi-infrastructure level and city level, as well as the ultimate goals in relation to the deployment of smart technologies in the industry are addressed. Part I covers smart design and construction; Part II, smart living and operation; and Part III broadens the scope to the whole smart city. Chapters examine how smart technologies can improve the effectiveness, productivity and efficiency of the built environment. An overview of theories and practices that are enabled by innovations and technologies for developing the SBE. The basis for new research agenda, new concepts and frameworks for future development. This handbook documents the current theories, practices and technologies and develops a holistic approach for research and practice by adopting a multidimensional outlook for the SBE. It is an essential reference work for all built environment stakeholders from academia through to the professions.

*Comprehensive Energy Systems* Ibrahim Dincer, 2018-02-07 *Comprehensive Energy Systems* Seven Volume Set provides a unified source of information covering the entire spectrum of energy, one of the most significant issues humanity has to face. This comprehensive book describes traditional and novel energy systems from single generation to multi-generation, also covering theory and applications. In addition, it also presents high-level coverage on energy policies, strategies, environmental impacts and sustainable development. No other published work covers such breadth of topics in similar depth. High-level sections include Energy Fundamentals, Energy Materials, Energy Production, Energy Conversion and Energy Management. Offers the most comprehensive resource available on the topic of energy systems. Presents an authoritative resource authored and edited by leading experts in the field. Consolidates information currently scattered in publications from different research fields: engineering as well as physics, chemistry, environmental sciences and economics, thus ensuring a common standard and language.
