**The Labyrinths of Reason** William Poundstone,

**Of Literature and Knowledge** Peter Swirski, 2007-02-12 Of Literature and Knowledge looks like an important advance in this new and very important subject literature is about to become even more interesting Edward O Wilson Pellegrino University Professor Harvard University Framed by the theory of evolution this colourful and engaging volume presents a new understanding of the mechanisms by which we transfer information from narrative make believe to real life Ranging across game theory and philosophy of science as well as poetics and aesthetics Peter Swirski explains how literary fictions perform as a systematic tool of enquiry driven by thought experiments Crucially he argues for a continuum between the cognitive tools employed by scientists philosophers and scholars or writers of fiction The result is a provocative study of our talent and propensity for creating imaginary worlds different from the world we know yet invaluable to our understanding of it Of Literature and Knowledge is a noteworthy challenge to contemporary critical theory arguing that by bridging the gap between literature and science we might not only reinvigorate literary studies but above all further our understanding of literature

**Paradoxical Thinking** Jerry L. Fletcher, Kelle Olwyler, 1997-06 Taking advantage of contradictory elements in oneself and one's situation can lead to better performance all around In this guide the authors present a five step process for using paradoxes to find solutions to a wide range of problems Includes case studies showing how real people have used paradoxical thinking to solve real problems

**Paradigms Regained** James L. Battersby, 1991-08-29 Paradigms

Regained is James L Battersby's effort to reclaim for literary study certain legitimate territories that have been needlessly abandoned on the theoretical battlefield Despite assertions to the contrary by poststructuralist or new historicist critics Battersby contends it is still possible to talk intelligently rigorously and usefully about such issues as literary intentionality stable references determinate meaning and objective value judgments of literary works What enables Battersby to make his

argument is his reliance not on continental thought but on Anglo American analytic and pragmatic philosophers including Donald Davidson Michael Dummett Nelson Goodman Hilary Putnam John Searle and Israel Scheffler Battersby synthesizes and builds on their work in a way that is at once fresh and distinctive

**How We Reason** Philip Johnson-Laird,2008-10-23

Good reasoning can lead to success bad reasoning can lead to catastrophe Yet it's not obvious how we reason and why we make mistakes so much of our mental life goes on outside our awareness In recent years huge strides have been made into developing a scientific understanding of reasoning This new book by one of the pioneers of the field Philip Johnson Laird looks at the mental processes that underlie our reasoning It provides the most accessible account yet of the science of reasoning We can all reason from our childhood onwards but how *How we reason* outlines a bold approach to understanding reasoning According to this approach we don't rely on the laws of logic or probability we reason by thinking about what's possible we reason by seeing what is common to the possibilities As the book shows this approach can answer many of the questions about how we reason and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl It shows why our irrational fears may become psychological illnesses why terrorists develop crazy ideologies and how we can act in order to improve our reasoning The book ends by looking at the role of reasoning in three extraordinary case histories the Wright brothers use of analogies in inventing their flyer the cryptanalysts deductions in breaking the German's Enigma code in World War II and Dr John Snow's inductive reasoning in discovering how cholera spread from one person to another Accessible stimulating and controversial *How we Reason* presents a bold new approach to understanding one of the most intriguing facets of being human

**Useful Fictions** Michael Austin,2010-01-01 We tell ourselves stories in order to live Joan Didion observed in *The White Album* Why is this Michael Austin asks in *Useful Fictions* Why in particular are human beings whose very survival depends on obtaining true information so drawn to fictional narratives After all virtually every human culture reveres some form of storytelling Might there be an evolutionary reason behind our species need for stories Drawing on evolutionary biology anthropology narrative theory cognitive psychology game theory and evolutionary aesthetics Austin develops the concept of a useful fiction a simple narrative that serves an adaptive function unrelated to its factual one In his work we see how these useful fictions play a key role in neutralizing the overwhelming anxiety that humans can experience as their minds gather and process information Rudimentary narratives constructed for this purpose Austin suggests provided a cognitive scaffold that might have become the basis for our well documented love of fictional stories Written in clear jargon free prose and employing abundant literary examples from the Bible to *One Thousand and One Arabian Nights* and *Don Quixote* to *No Exit* Austin's work offers a new way of understanding the relationship between fiction and evolutionary processes and perhaps the very origins of literature

**Semiosis in the Postmodern Age** Floyd Merrell, 1995 Who are we to suppose we are capable of comprehending the world of which we are a part and what is the world to suppose it can be understood by us minuscule and insignificant spatiotemporal warps contained within it This provocative question opens Floyd Merrell's study of postmodernism and the thought of Charles Sanders Peirce part of the author's ongoing effort to understand our contemporary cultural and intellectual environment The specific focus in this interdisciplinary study is the modernism postmodernism dichotomy and Peirce's precocious realization that the world does not lend itself to the simplistic binarism of modernist thought In Merrell's examination of postmodern phenomena the reader is taken through various facets of the cognitive sciences philosophy of science mathematics and literary theory Merrell's consideration of Peirce's complex and inadequately understood concept of the sign is enhanced through numerous charts and figures Theories hypotheses and speculation in the physical sciences are then brought to bear on Peircean semiotics The final chapter critiques the often undiscriminating acceptance of postmodern practices in today's academic world ***Elegy & Paradox*** William David Shaw, 1994 Shaw argues that the idea of an elusive truth of an apparent contradiction that invites resolution explains the power of many elegies we read After exploring paradoxes of performative language and circular form in classical and confessional elegies respectively he examines the paradoxes of a silent speaking word in Romantic elegy and paradoxes of breakdown and breakthrough in modern elegy A contrast between strong and weak mourners in Ben Jonson's and Henry King's elegies between impact and tremor in Tennyson's elegies and between tough and tender minded mourners in Frost's Home Burial suggests that reading elegies like

writing them is more than an academic exercise it is also a life and death issue **Auslegung** ,2002 *Philosophy and Contemporary Issues* John Roy Burr,1992 One of the most successful volumes in its field over the last 20 years Philosophy and Contemporary Issues introduces today s readers to philosophy with timely approachable readings of philosophical significance The authors strive to demonstrate how philosophy illuminates and helps solve some of the important problems facing contemporary man and they encourage readers to engage in philosophizing themselves This book successfully makes the subject interesting and intelligible for readers encountering philosophy for the first time Essays address freedom and determinism morality and society state and society and knowledge and science For individuals interested in an accessible introduction to philosophy **The Utne Reader** ,1989 **PC/Computing** ,1989-03 **The Computer and the Mind** Philip Nicholas Johnson-Laird,1993 This book addresses the central issues of cognitive science such as how the mind works and what enables us to have thoughts and feelings The author explains what cognitive science is describes its origins and outlines what it has achieved **Grue!** Douglas Frank Stalker,1994 There are now about 20 different approaches or types of proposed solution to the grue problem the entrenchment solution the positional qualitative solution the simplicity solution the natural kind solution the coherence solution the incoherence dissolutions the falsificationist response the evolutionary approach the various Bayesian treatments and so on No single approach has emerged as the consensus view or even as a clear leader **Indeterminacy** Jose V. Ciprut,2008 Interdisciplinary perspectives on the concepts of indeterminacy and indeterminability and the distinctions between the two Formal thinking about certainty uncertainty gained greater focus in scientific domains with the advent of particle physics and quantum mechanics Concern with the exact predictability of events under guidance from scientific determinism led to speculation then acknowledgement of quantum indeterminacy But distinctions were made between what is physically indeterminate out there and what is indeterminable by human observation or in human action over here on the inside right now The implications of these insights into indeterminacy and indeterminabilities for practical and theoretical knowledge span physics philosophy ontology causality and the philosophy of mind In this book contributors from a range of disciplines consider the concept of indeterminacy and a few varieties of indeterminability with attention to the distinctions between the two phenomena appropriate approaches for examining both and the differences vis vis uncertainty vagueness and ambiguity **Kirkus Reviews** ,1988 Adult books are categorized by genre i e fiction mystery science fiction nonfiction Along with bibliographic information the expected date of publication and the names of literary agents for individual titles are provided Starred reviews serve several functions In the adult section they mark potential bestsellers major promotions book club selections and just very good books in the children s section they denote books of very high quality The unsigned reviews manage to be discerning and sometimes quite critical
