The contributors share detailed lesson plans about selected research concepts or skills in education and related disciplines as well as discussions of the intellectual preparation needed to effectively teach the lesson. The book is divided into eight sections covering the following key elements within education and related research problems and research questions: literature reviews and theoretical frameworks, research design, quantitative methods, qualitative methods, mixed methods, findings and discussions, and special topics such as student identity development, community and policy engaged research, and research dissemination. Within each section, individual chapters specifically focus on skills and perspectives needed to navigate the complexities of educational research.
