

Practice Quiz: Solving Systems. Homework 4-4

1) Two cities are connected by a highway. City 1 is located at point (3,6) and

City 2 is located at (-6,-12)

- a) Find the slope of the line that passes through these two points.

Given the formula $m = \frac{y_2 - y_1}{x_2 - x_1} = \frac{-12 - 6}{-6 - 3} = \frac{-18}{-9} = 2$

- b) Write a linear equation in the slope-intercept form ($y = mx + b$) and graph it

$$6 = 2(3) + b$$

$$6 - 6 = 0$$

$$y = 2x + b$$

$$\boxed{y = 2x}$$

Exercise #1: Consider the system of inequalities shown below. Determine if each of the following points is a solution or not to the system. Show work that justifies your answers.

(a) (3,8)

NO

(b) (5,9)

✓

$$y \geq -x + 10$$

$$m = -1$$

$$b = 10$$

$$x + y > 10$$

$$y \geq 3x - 5$$

- (c) Graph the solution set to this system of inequalities.

$$y \geq 3x - 5$$

$$m = 3$$

$$b = -5$$

Math books are for curious students who want learning to feel like a journey. The scenarios are arranged to show how new math concepts are related to previous concepts they have already learned. Students naturally learn at different paces and these books help teachers manage flexible pacing in their classes. Learn more at www.summitmathbooks.com. Topics in this book: Comparing Independent And Dependent Quantities Representing A Function With An Equation Or A Graph Increasing Decreasing Or Constant The Domain And Range Of A Function More Scenarios That Involve Functions Cumulative Review Answer Key. This book introduces you to functions to build a foundation for learning about specific types of functions in later Summit Math books. Using a wide variety of scenarios that involve functions, this book shows you how to identify increasing decreasing and constant intervals as well as the domain and range of a function. Without using the phrase piecewise functions, this book develops an introductory understanding of what they are by guiding you through the process of graphing only part of a function and thinking about how to restrict the domain. Each concept is developed gradually to show that new ideas build on topics you are already familiar with. Student testimonials: This is the best way to learn math. Summit Math books are unlike typical textbooks. It doesn't matter how you learn or what speed you go at; you can learn at your own pace while still understanding all the material. Summit Math Books have guided me through algebra. They are the stepping stones of what it takes to think like a mathematician. I really enjoy learning from these books; they clearly demonstrate how concepts are built over other concepts. You don't just memorize; you actually understand it. Parent testimonials: Summit Math Books not only helped my daughter learn the math; they helped her to love learning math in and of itself. Summit Math books have a fun, self-paced way to explain math concepts. I am absolutely thrilled with this math program. The books are so well organized and the content builds from one lesson to the next. We are really impressed and grateful for our boys' understanding of what the math means, not just how to get problems right. We should all learn to understand math this way. As the mother of a teenage daughter who previously had occasional difficulty in math, it was refreshing to watch her actually enjoy her math class and to understand the subject matter without struggling. I have three kids that have used Summit Math. Using these books, they have more freedom to learn and explore at their own pace during class, with notes already incorporated within the book. Teacher testimonials: Summit Math allows students to work at their own pace, which allows me the opportunity to provide individualized attention to those who need it. Summit Math emphasizes understanding concepts rather than memorizing rules. Students take ownership while acquiring the necessary skills to solve meaningful math problems. It has been a real benefit having problem sets that are explicitly designed to guide students through the development of their understanding of the how and why behind the concepts they are studying.
