Australian Army Protocol Manual 2015:

Hague Law Interpreted Stuart Casey-Maslen, Steven Haines, 2018-11-15 Given the centrality of Hague Law to the lawful prosecution of warfare the relative paucity of dedicated works is surprising The general formulation of Hague Law rules is largely uncontroversial but this clarity stands in stark contrast to their interpretation and practical application How precisely for instance the fundamental rules of distinction and proportionality in attack are to dictate and constrain the planning and practice of warfare continues to be highly uncertain This important new publication fills the gap in the literature Offering a comprehensive assessment of Hague Law it explores questions of definitions and accountability and navigates the substantive rules and their application to different types of warfare [Guidelines for Mine Waste Dump and Stockpile Design](#)

Design Mark Hawley, John Cuning, 2017-04-01 Guidelines for Mine Waste Dump and Stockpile Design is a comprehensive practical guide to the investigation design operation and monitoring of mine waste dumps dragline spoils and major stockpiles associated with large open pit mines These facilities are some of the largest man made structures on Earth and while most have performed very well there are cases where instabilities have occurred with severe consequences including loss of life and extensive environmental and economic damage Developed and written by industry experts with extensive knowledge and experience this book is an initiative of the Large Open Pit LOP Project It comprises 16 chapters that follow the life cycle of a mine waste dump dragline spoil or stockpile from site selection to closure and reclamation It describes the investigation and design process introduces a comprehensive stability rating and hazard classification system provides guidance on acceptability criteria and sets out the key elements of stability and runout analysis Chapters on site and material characterisation surface water and groundwater characterisation and management risk assessment operations and monitoring management of ARD emerging technologies and closure are included A chapter is also dedicated to the analysis and design of dragline spoils Guidelines for Mine Waste Dump and Stockpile Design summarises the current state of practice and provides insight and guidance to mine operators geotechnical engineers mining engineers hydrogeologists geologists and other individuals that are responsible at the mine site level for ensuring the stability and performance of these structures Readership includes mining engineers geotechnical engineers civil engineers engineering geologists hydrogeologists environmental scientists and other professionals involved in the site selection investigation design permitting construction operation monitoring closure and reclamation of mine waste dumps and stockpiles **Commentary on the Second**

Geneva Convention , 2017-12-21 The application and interpretation of the four Geneva Conventions of 1949 have developed significantly in the sixty years since the International Committee of the Red Cross ICRC first published its Commentaries on these important humanitarian treaties To promote a better understanding of and respect for this body of law the ICRC commissioned a comprehensive update of its original Commentaries of which this is the second volume Its preparation was coordinated by Jean Marie Henckaerts ICRC legal adviser and head of the project to update the Commentaries The Second

Convention is a key text of international humanitarian law. It contains the essential rules on the protection of the wounded sick and shipwrecked at sea, those assigned to their care and the vessels used for their treatment and evacuation. This article by article Commentary takes into account developments in the law and practice to provide up to date interpretations of the Convention. The new Commentary has been reviewed by humanitarian law practitioners and academics from around the world including naval experts. It is an essential tool for anyone working or studying within this field. *Commentary on the Third Geneva Convention*, 2021-09-09. The application and interpretation of the four Geneva Conventions of 1949 and their two Additional Protocols of 1977 have developed significantly in the seventy years since the International Committee of the Red Cross (ICRC) first published its Commentaries on these important humanitarian treaties. To promote a better understanding of and respect for this body of law, the ICRC commissioned a comprehensive update of its original Commentaries, of which this is the third volume. The Third Convention relative to the treatment of prisoners of war and their protections takes into account developments in the law and practice in the past seven decades to provide up to date interpretations of the Convention. The new Commentary has been reviewed by humanitarian law practitioners and academics from around the world. This new Commentary will be an essential tool for anyone involved with international humanitarian law. *The Law of Armed Conflict and the Use of Force* Frauke Lachenmann, Rüdiger Wolfrum, 2017. This volume collects articles on the law of armed conflict and the use of force from the Max Planck Encyclopedia of Public International Law to facilitate easy access to content from the leading reference work in international law. Critical Mental Health in Australia and Aotearoa New Zealand Natalie Ann Hendry, Effie Karageorgos, 2025-04-24. This interdisciplinary volume examines the social production of mental health and illness in Australia and Aotearoa New Zealand. It draws together cutting edge critical mental health scholarship from the region to interrogate how personal, community, institutional and mediated relations make and remake experiences of mental health. In the wake of the widespread insertion of psy considerations into everyday lives here, contributors demonstrate how the relations between communities, practices, professionals and institutions often replicate long standing histories of discrimination and violence motivated by psychiatric classification, even as the psy disciplines move into supposedly more transformational domains: digital technology, schooling, human resources and social media, for example. The book's chapters reflect the current diversity within academic studies of mental health and illness in Australia and Aotearoa. This includes a wide range of case studies from war trauma in the Australian military and pornography addiction to the depathologisation of trans health and peer workers in mental health services. Critical Mental Health in Australia and Aotearoa New Zealand offers unique insights particular to the region to students and scholars of critical psychology, history, sociology, medical humanities and education. Weapons and the Law of Armed Conflict William H. Boothby, 2016-03-10. Bringing together the law of armed conflict governing the use of weapons into a single volume, the fully updated Second Edition of *Weapons and the Law of Armed Conflict* interprets these rules and discusses the factors

influencing future developments in weapons law After relating the historical evolution of weapons law the book discusses the important customary principles that are the foundation of the subject and provides a condensed account of the law that exists on the use of weapons The treaties and customary rules applying to particular categories of weapon are thereafter listed and explained article by article and rule by rule in a series of chapters Having stated the law as it is the book then explores the way in which this dynamic field of international law develops in the light of various influences The legal review of weapons is discussed both from the perspective of how such reviews should be undertaken and how such a system should be established Having stated the law as it is the book then investigates the way in which this dynamic field of international law develops in the light of various influences In the final chapter the prospects for future rule change are considered This Second Edition includes a discussion of new treaty law on expanding bullets the arms trade and norms in relation to biological and chemical weapons It also analyses the International Manuals on air and missile warfare law and on cyber warfare law the challenges posed by lethal autonomous weapon systems and developments in the field of information and telecommunications otherwise known as cyber activities
